

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

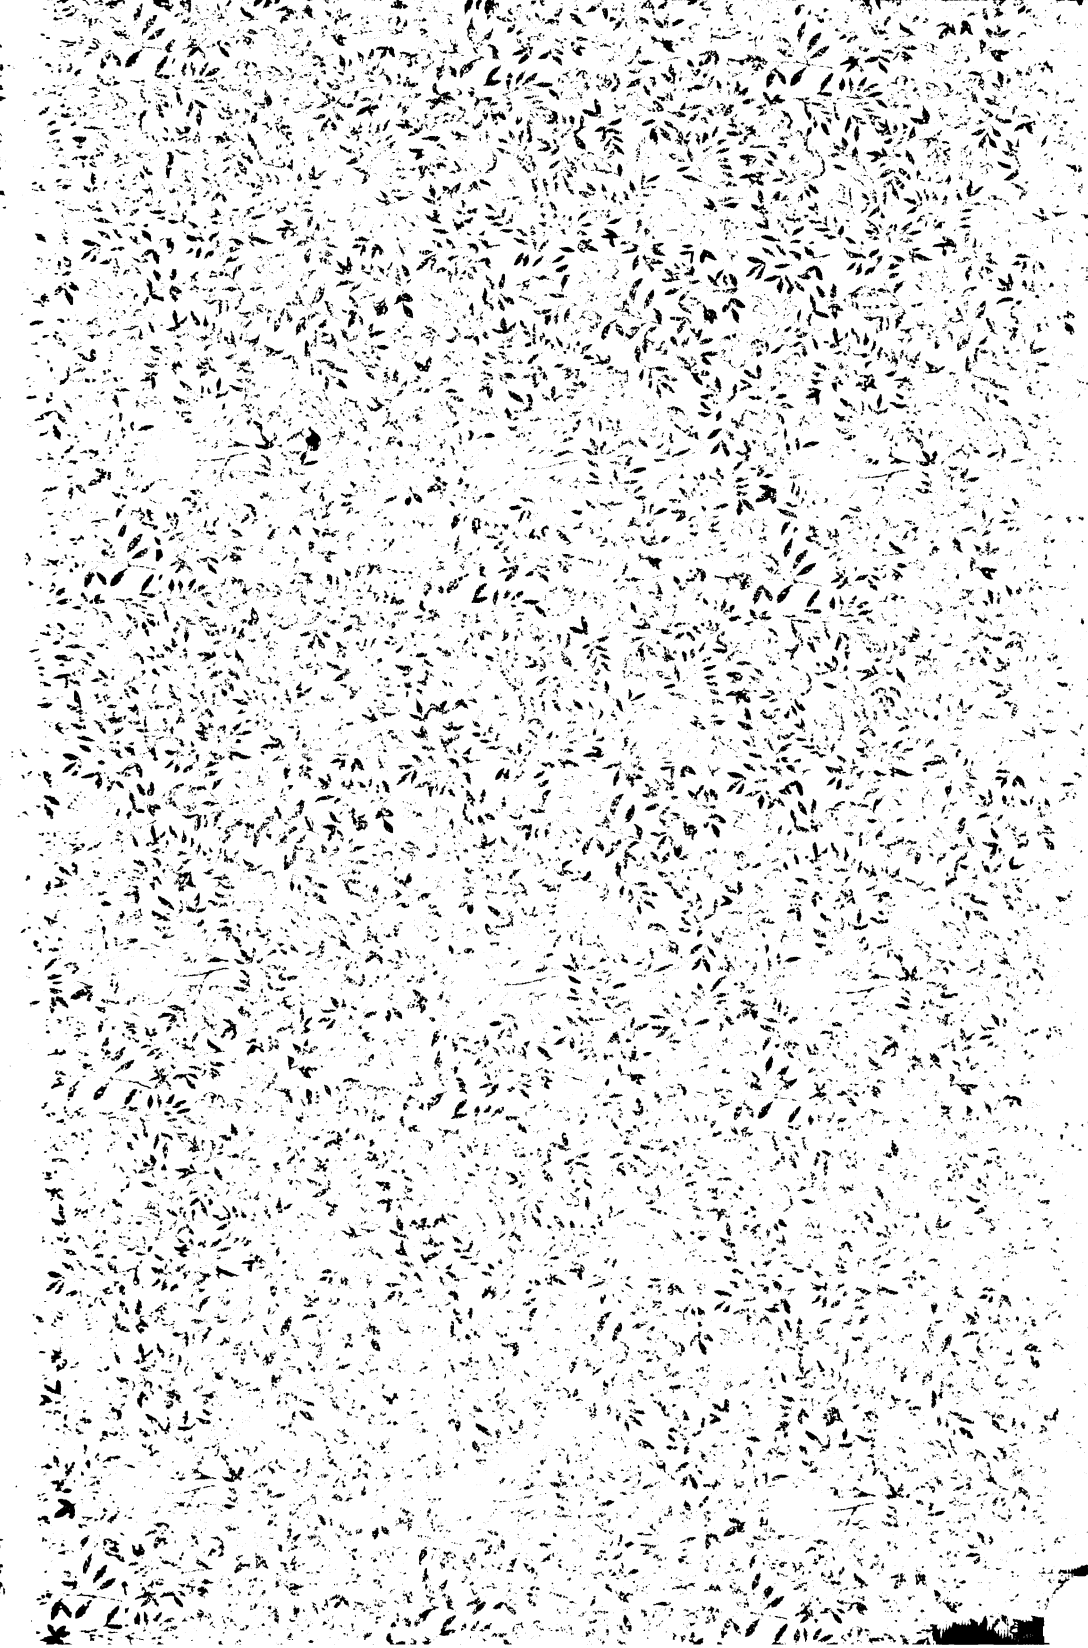

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF THE PRESIDENT.

REPORT OF THE PRESIDENT.

REPORT

OF THE

PRESIDENT.

To the Board of Education of the City of Chicago.

GENTLEMEN: As another year has passed away we are called upon to again consider the necessities of the School Department, and as President of the Board of Education, I submit to you the following report of the condition of the Public Schools of the City, the School Finances and School Property during the year ending July 31, 1882.

EDUCATIONAL DEPARTMENT.

The year just closed has been fruitful of good results in the educational management of the schools. The management has been judicious, practical and efficient, thoroughly systematic and harmonious ; no serious obstacles have been met with in matters of discipline, and the faithful performance of duty by our Superintendents, Principals and Teachers has been rewarded by very satisfactory progress on the part of pupils. There has been, since the writing of my last report, a large increase in the school population of our city and consequently a large increase in the daily

REPORT

OF THE

PRESIDENT.

To the Board of Education of the City of Chicago.

GENTLEMEN: As another year has passed away we are called upon to again consider the necessities of the School Department, and as President of the Board of Education, I submit to you the following report of the condition of the Public Schools of the City, the School Finances and School Property during the year ending July 31, 1882.

EDUCATIONAL DEPARTMENT.

The year just closed has been fruitful of good results in the educational management of the schools. The management has been judicious, practical and efficient, thoroughly systematic and harmonious ; no serious obstacles have been met with in matters of discipline, and the faithful performance of duty by our Superintendents, Principals and Teachers has been rewarded by very satisfactory progress on the part of pupils. There has been, since the writing of my last report, a large increase in the school population of our city and consequently a large increase in the daily

attendance of pupils in the schools, necessitating an increased number of teachers.

The consolidation of several Primary Schools by transferring the teachers and pupils to new buildings has had the effect of reducing the number of Primary School Principals, while the number of primary grade teachers has increased, but as the number of Grammar Schools has increased, the total number of Principals employed at the close of the year was only one less than the number employed during the previous year, while the number of teachers employed at the close of the year was 62 greater than at the close of the previous year.

At the close of the School Year, the Board had in its employ 59 Principals—37 of whom were in Grammar Schools, 19 in Primary Schools, and 3 in High Schools. The number of Teachers employed at the close of the year was 960—31 of whom were in the High Schools, 927 in the Grammar and Primary Schools, and 3 of whom were Special Teachers or Superintendents of German, Music and Drawing, making an entire teaching force of 1,019 on the pay-roll.

The Teachers' Pay-Roll for the school month of June, 1881, amounted to \$66,706.31; for the corresponding month in 1882, it amounted to \$71,634.06, showing an increase in the monthly expenditures for teachers' salaries of \$4,927.75.

The total enrollment of pupils during the year was

68,614, an increase over the previous year of 5,473 ; the increase in the number of teachers being 61.

As a comparison of the foregoing statistics with those of the previous year may be necessary in your deliberations, I have followed the form used in last year's report, and for convenient reference and ready comparison I repeat the tabulated form used therein, as follows:

	FOR THE YEAR ENDING—		Increase.
	July 31, 1881.	July 31, 1882.	
Total enrollment of pupils.....	63,141	68,614	5,473
Average daily membership.....	47,523	51,023	3,770
Number of teachers employed.....	958	1,019	61
Teachers' pay-roll for month of June	\$66,706 31	\$ 71,634 06	\$ 4,927 75
Total amount paid superintendents and teachers.....	640,233 56	696,428 92	56,195 36
Total amount paid engineers and janitors.....	50,842 63	56,786 50	5,943 87
Amount paid office employes, attorney and school agent.....	10,137 53	11,859 53	1,722 00
Total expenditures on account of salaries.....	701,213 72	765,074 95	63,861 23
Average cost per pupil on salaries and incidentals on average daily membership.....	16 28	16 51	.23

A comparison of these figures shows a greater ratio of increase in the number of pupils during the past year than shown by the last report, and while the number of teachers and other employes has increased, yet the increase in expenditures for salaries is proportionately much less than that of previous years. An increase of 5,473 pupils during one year is a matter calling for serious consideration in making estimates for the necessities of the department for the succeeding fiscal year, and while salaries should not be raised, yet an increased appropriation is necessary, both on account

attendance of pupils in the schools, necessitating an increased number of teachers.

The consolidation of several Primary Schools by transferring the teachers and pupils to new buildings has had the effect of reducing the number of Primary School Principals, while the number of primary grade teachers has increased, but as the number of Grammar Schools has increased, the total number of Principals employed at the close of the year was only one less than the number employed during the previous year, while the number of teachers employed at the close of the year was 62 greater than at the close of the previous year.

At the close of the School Year, the Board had in its employ 59 Principals—37 of whom were in Grammar Schools, 19 in Primary Schools, and 3 in High Schools. The number of Teachers employed at the close of the year was 960—31 of whom were in the High Schools, 927 in the Grammar and Primary Schools, and 3 of whom were Special Teachers or Superintendents of German, Music and Drawing, making an entire teaching force of 1,019 on the pay-roll.

The Teachers' Pay-Roll for the school month of June, 1881, amounted to \$66,706.31; for the corresponding month in 1882, it amounted to \$71,634.06, showing an increase in the monthly expenditures for teachers' salaries of \$4,927.75.

The total enrollment of pupils during the year was

68,614, an increase over the previous year of 5,473 ; the increase in the number of teachers being 61.

As a comparison of the foregoing statistics with those of the previous year may be necessary in your deliberations, I have followed the form used in last year's report, and for convenient reference and ready comparison I repeat the tabulated form used therein, as follows:

	FOR THE YEAR ENDING—		Increase.
	July 31, 1881.	July 31, 1882.	
Total enrollment of pupils.....	63,141	68,614	5,473
Average daily membership.....	47,523	51,023	3,770
Number of teachers employed.....	958	1,019	61
Teachers' pay-roll for month of June	\$66,706 31	\$ 71,634 06	\$ 4,927 75
Total amount paid superintendents and teachers.....	640,233 56	696,428 92	56,195 36
Total amount paid engineers and janitors.....	50,842 63	56,786 50	5,943 87
Amount paid office employes, attorney and school agent.....	10,137 53	11,859 53	1,722 00
Total expenditures on account of salaries.....	701,213 72	765,074 95	63,861 23
Average cost per pupil on salaries and incidentals on average daily membership.....	16 28	16 51	.23

A comparison of these figures shows a greater ratio of increase in the number of pupils during the past year than shown by the last report, and while the number of teachers and other employes has increased, yet the increase in expenditures for salaries is proportionately much less than that of previous years. An increase of 5,473 pupils during one year is a matter calling for serious consideration in making estimates for the necessities of the department for the succeeding fiscal year, and while salaries should not be raised, yet an increased appropriation is necessary, both on account

Census taken in June of this year, shows 32,038 pupils in private schools, and the total number of persons between the ages of 6 and 16 years to be 110,389.

These facts clearly demonstrate the necessity of continuing, with unabated energy, the building of new school houses, as, without additional school rooms by means of which the number of pupils in charge of each teacher can be decreased, it is impossible to carry out many of the reforms in the instruction of primary grade pupils which are being suggested by educators and others interested in the advancement of our school interests—in fact, this obstacle is met on the very threshold of every such proposition, and it can truly be said that with the means at our command, our teachers are doing all that can be done to keep pace with the progress of the times. With the so-called progress of the times, however, must not be included the pet ideas of many chronic grumblers, who, if their theories were put into practice, would immediately feel uncomfortable for want of a hobby to talk about. But among all the conflicting theories advanced, careful and discerning educators will not fail to cull therefrom that which can be put into practical operation, and when they desire to do so, it is to be deplored that they are met with so stubborn an obstacle as lack of school accommodations. I do not wish to repeat all that was said in the last report concerning lack of school rooms, but simply say, that so far as additional school accommodations are concerned, all that was then said, is still applicable to our necessities.

NEW SCHOOL SITES.

During the year the Board recommended to the City Council the purchase of seven school sites in different parts of the city, but of these the Council only confirmed the purchase of three, as follows: One on Throop Street near Twentieth Street, one on Lexington Street, and one on Wentworth Avenue near Thirty-Third Street. The other sites recommended were in localities in which schools are greatly needed, and should have been purchased. The embarrassment which the Board experiences in this matter of procuring school sites, by being subjected to the necessity of begging the same of the City Council, the members of which too often take up and advocate the petty opposition of some adjoining property owner, rather than the wants of the school population, is an obstacle in the way of furnishing the people with school houses which ought to be obliterated by State legislation. There is no good reason why the Board of Education should not be vested with full power to purchase school sites, and full power to make its own appropriations for all school purposes. The people who need schools, look to and hold this Board responsible for a failure to provide them, when in the majority of such cases their Aldermen who represent them in the City Council are the real delinquents, and not only neglect to assist this Board, but positively oppose it, which opposition frequently proceeds from motives not exalting, to say the least.

The city now owns 67 school buildings, having seating accommodations for 54,785 pupils, and uses nine rented buildings with a seating capacity of 1,310.

SCHOOL FINANCES.

The financial affairs of the department are in very good condition. Considering the increase in receipts, and the increase in expenditures, our finances are practically, in the same condition, proportionately, as during the previous year.

The total cash receipts during the year were	\$1,457,120.55
The total expenditures during the year were	1,146,924.34
Excess of receipts over expenditures.....	\$ 310,196.21

This excess will be the actual available fund out of which to meet current expenses during the remainder of the fiscal year, to January 1, 1883, and will enable the Board to pay salaries in cash without resorting to "scrip" drawn against the Appropriation of 1882, which Appropriation will not be collected until 1883. A reserve fund of at least this amount or even greater, should always be on hand at the end of each school year, in order to cover the expenses of the balance of the fiscal year.

The following table shows the receipts and expenditures for the School Year 1881-1882:

RECEIPTS FOR SCHOOL YEAR 1881-82.

On account of School Tax Fund.....	\$1,114,985 70
On account of State Dividend.....	155,394 26
On account of Rent of School Fund Lands, Interest on Investments of School Fund, etc.....	169,978 47
From Miscellaneous Sources.....	16,762 12
Total Cash Receipts.....	\$1,457,120 55

Report of the President.

19

EXPENDITURES FOR SCHOOL YEAR 1881-82.

For Salaries—	
Superintendents and Teachers.....	\$696,428 92
Office Employes, including Attorney and School Agent..	11,859 53
Engineers and Janitors.....	56,786 50
For Rents—	
Of Buildings and Rooms used for School purposes.....	6,700 82
Of School Fund Lots used for School purposes.....	3,217 55
For Fuel.....	36 453 86
For Repairs to Buildings, and Furniture, Apparatus, etc.....	25,696 75
For Permanent Improvements, etc.....	21,775 60
For Management of School Fund, exclusive of Salary of Agent	800 02
For School Census.....	3,968 00
For Purchase of Sites, Erection of Buildings, etc.....	256,588 88
For Special Assessments.....	15,052 42
For Evening Schools.....	11,610 54
Total.....	<u>\$1,146,924 84</u>

TAX LEVY FOR FISCAL YEAR 1882.

City Tax for all purposes.....	\$4,227,402 98
Tax for School purposes.....	1,191,928 60
Per cent. of School Tax on total amount levied.....	28.2

SCHOOL FUND PROPERTY.

There has been no change of importance during the year in the condition of the School Fund Property. At the time of making the last report the National Safe Deposit Company, as lessee of the "Old Post Office" property, was engaged in the removal of the old building, which work has been since completed, and a magnificent new bank and office building has been erected on the site, which will, when completed, be in full compliance with the agreement and bond given by the lessee to the Board, as to cost of construction, durability, and style of architecture. Of the School

Fund Lands vacant at the time of making the last report, none have been rented.

Total Value of School Fund Lands.....	\$2,572,316 80
Total Annual Rental.....	149,745 71
Value of Unrented School Fund Lands.....	24,735 00

STUDY OF GERMAN.

During the year the study of the German Language was introduced, upon the required petition of parents of pupils, into the Armour Street School and the Sheridan School.

The number of pupils who received instruction in this branch of study, including the High Schools was 5,332. The number in the Grammar Schools was 4,966. Number in High Schools 366. The average number of pupils in the Grammar Schools studying German during the year was 4,186. The number of Teachers of German in the Grammar Schools, including the Special Teacher, was 39. The expenditures for this purpose in the Grammar Schools, including salary of the Special Teacher, was \$19,574.73. Average cost per pupil in Grammar Schools, \$4.68.

HIGH SCHOOLS.

The three High Schools have been, during the year, conducted successfully and efficiently. Those of the North and South Divisions have just graduated their first classes of the four years course.

Many commentaries of a disparaging character have been made of late upon our system of High

Schools, as not giving instruction in the more useful branches of learning, and in not fitting young people for "practical" occupations—not that the instruction given was undesirable or without value, but that instruction of a different kind ought to be given, by which some useful trades might be acquired by the pupils. Upon this subject I would say that although it would be desirable to establish a system of manual education in institutions for that purpose as advocated in the last report, yet the High Schools, as now organized, could not and ought not to be dispensed with. The record of enrollment in the city schools shows that during the past year, out of 68,614 pupils, only 1,377 were in the High Schools. The school census taken during the month of June last shows that there are in the city 241,693 persons under the age of 21 years, and that the total population of the city is 560,693.

The argument of commercial gentlemen, who have made stupendous fortunes by superior mental power and educational advantages aiding them in the successful management of capital, that we are, as they term it, damaging the rising generation by our High Schools, is met with the fact that out of a population of over 560,000 we are giving High School instruction to 1,377 persons. Out of 241,693 persons under 21 years of age, it would be strange indeed could we not find thirteen or fourteen hundred who would seek a course of literary instruction such as we give in our High Schools. Most of the gentlemen who make these

charges, it will be found, have their children educated in the best literary institutions in the country, and would not patronize a school for manual training. The fault cannot be found in our High School system, but in the absence both of means and of legal authority to establish schools for manual training. The excellence of such institutions cannot be doubted, but until we have them or have authority to establish them, our true line of duty is to maintain and perfect, as far as possible, that which we have. The schools which we now have, Primary, Grammar and High, could not, in any event, be dispensed with; courses and methods of instruction might be varied from time to time, but that these courses should contain manual instruction is absurd when it is known to be a fact that four-fifths of our pupils never remain in school beyond the time required to go through the primary grades; commencing at the age of six years, they leave at the ages of nine, ten or eleven. During these few years they should have instruction such as they are now receiving, in the simple rudiments of learning. The small number which go through the Grammar Grades, and the still smaller number which go through the High Schools, will not, in after years, prove to be serious encumbrances to themselves or the community, but will prove to be men and women possessing intelligence and moral worth as citizens; neither will their number prove to be too great a percentage of intelligence as compared with the entire mass. Neither the state nor the muni-

ciality is endangered by such intelligence as is imparted to our Grammar or High School pupils. True it is that it requires selfish men to make good business men—men who can accumulate property; but after having so accumulated property, the element of selfishness frequently still remains, and the taxation of that property for High School purposes, that the children of the less fortunate may have an education if they aspire to it, is what troubles these people who “*want to see something practical in our schools.*”

In these remarks I do not wish to be understood as placing a low estimate upon the benefits to be derived from the establishment of schools for manual training in connection with a literary course, but I do maintain that our present system is working in the right direction, and should not be deviated from, except in matters of detail and methods of instruction, which we leave entirely in the hands of the educational profession. The only fault that can be found with the system is that we perhaps try to do too much for the pupil in all the grades during the short time he is in the schools by crowding the course with too many studies, but that is also a question for the profession to deal with.

In this connection the following statistics may be instructive :

Total population of city in June, 1882.....	560,693
Total number of persons under 21 years of age in June, 1882...	241,693
Total number of persons between the ages of 6 and 16 years in June, 1882.....	110,389
Total enrollment in Public Schools in June, 1882.....	68,614
Total enrollment in the Primary Departments in June, 1882....	55,488

Public Schools.

Total enrollment in the Grammar Department in June, 1882...	11,748
Total enrollment in the High School Department in June, 1882,	1,877
Total number of girls in High School Department in June, 1882,	995
Total number of boys in High School Department in June, 1882,	382
Number of pupils in an Ungraded Room.....	41
Total number of pupils in Private Schools in June, 1882.....	32,088
Total expenditure for High Schools	\$50,810 13
Cost per pupil in High Schools	\$ 43 83

SCHOOLS FOR THE DEAF AND DUMB.

Our schools for deaf mutes have been conducted very successfully during the year under the Principalship of Prof. P. A. Emery, and the same corps of teachers we had last year.

Number of Teachers, including Principal.....	6
Number of pupils enrolled.....	57
Expenditures for salaries, rents, fuel, janitors' services, books and apparatus.....	\$4,051 09
Cost per pupil.....	\$71 17

EVENING SCHOOLS.

Evening Schools were conducted during a portion of the year in several of the school buildings; these schools, with the exception of the Principals, being taught by teachers not employed in our day schools, and attended by pupils who could not attend the day schools. Through these schools, many persons whose early education was neglected, obtained useful instruction in the elementary branches.

The funds used for the maintenance of these schools are derived from a special appropriation made by the City Council. They were opened Oct. 3, 1881, and continued in session for sixteen weeks, at a total cost of \$11,610.54, having a total enrollment of 4,401 pupils,

and a total average attendance of 952.3. Cost per pupil \$12.19, estimated on average attendance.

These figures show that these schools are proportionately more expensive than the day schools. The average cost per pupil given above includes the Evening High School, which cost \$17.55 per pupil. This is a very expensive school, and neither the necessity for it nor the results justify the expenditure. Aside from the Evening High School, the necessity for and the results of the other Evening Schools both justify their continuance.

VALUE OF SCHOOL PROPERTY.

School sites	\$1,120,635 00
School buildings, furniture and heating apparatus	3,325,175 00
School Fund lands	2,572,316 80
Total	<u>\$7,018,126 80</u>

CONCLUSION.

The business management has been performed with systematic accuracy and a commendable degree of zeal on the part of our office and business employes. The thanks of the Board are due to Mr. Shepherd Johnston, Clerk, Mr. M. B. Hicks, Business Agent, Mr. John A. Guilford, Book-keeper, and Mr. John W. Foster, Assistant Clerk, for the faithful and courteous manner in which they have at all times discharged their duties. It is a matter for congratulation that in the promotion of employes, the Board adheres to the proper civil service rules, by means of which the efficiency of the business management is never impaired.

The work done by Superintendent George Howland, Esq., and Assistant Superintendent E. C. Delano, Esq., together with the services of our efficient corps of School Principals, is worthy of our highest commendation. They, as the directors of the school work, have been energetic and progressive, prolific of measures, firm in discipline, and faithful to their trusts.

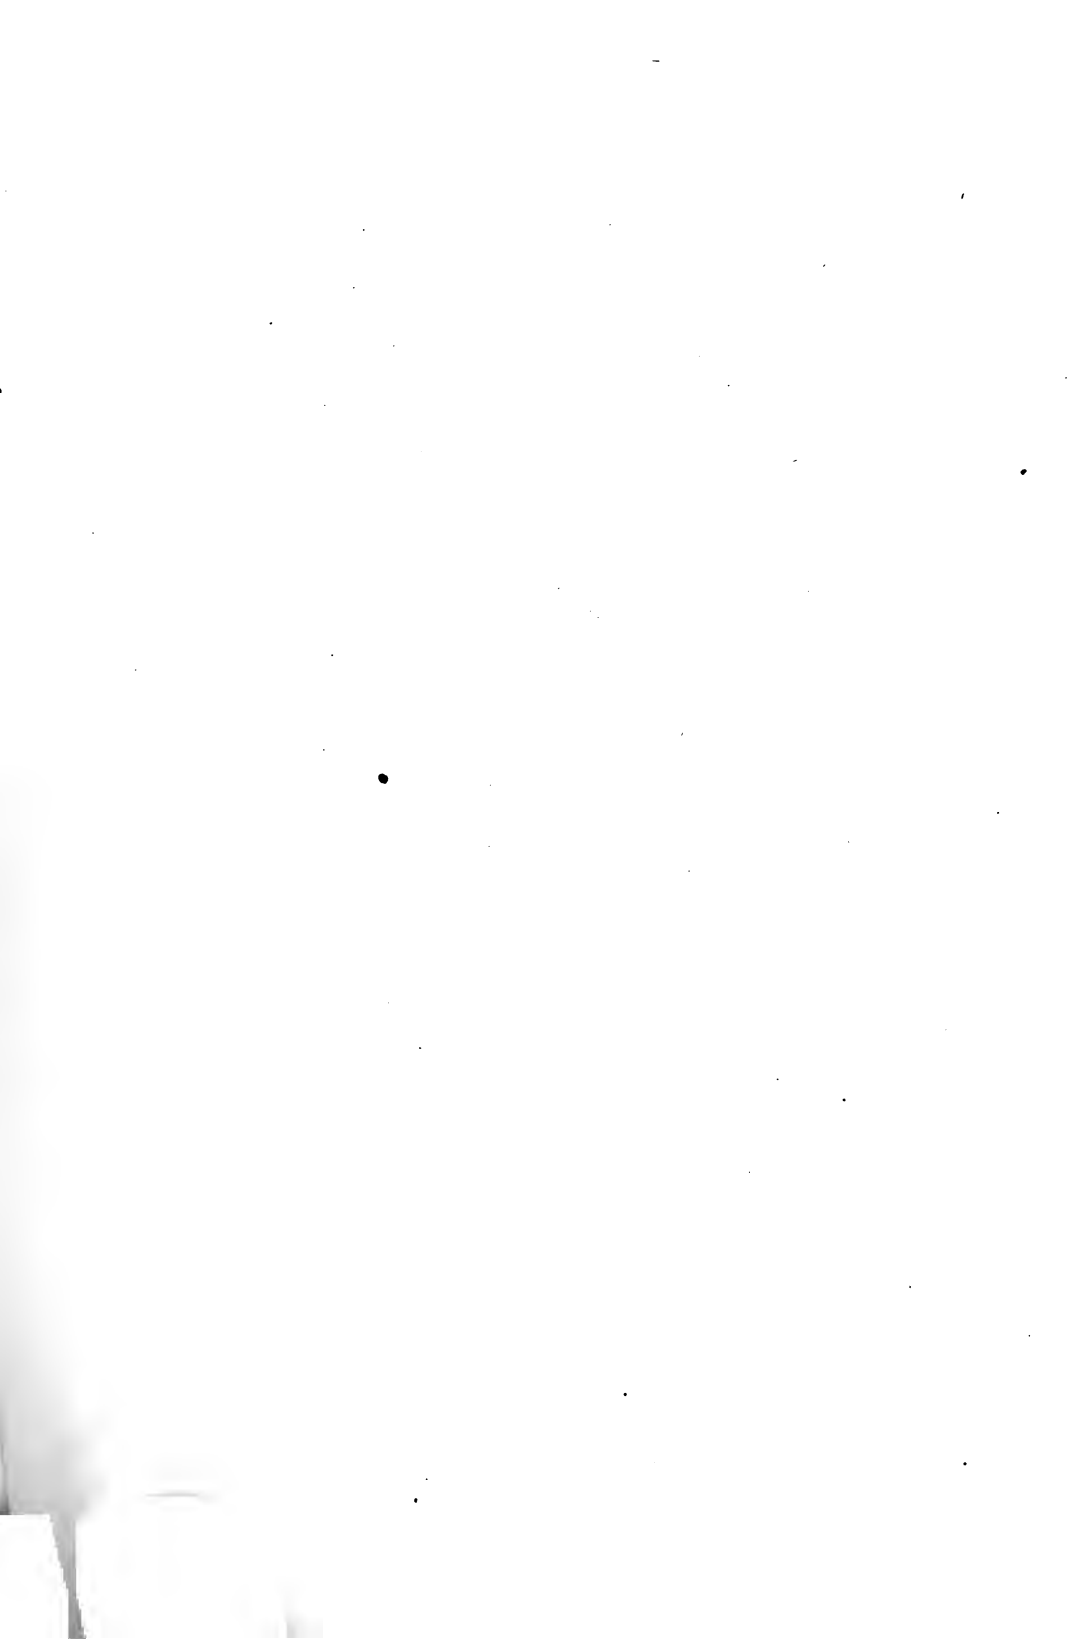

To our large corps of lady teachers must be accorded our warmest praise, for after all that may be said about plans and theories, supervision and direction, the actual work of imparting instruction to the school children is done by these teachers, and they, sooner than any one else, usually ascertain the true value of theories advanced; no progress can be made in the attainment of excellent results in our public schools without an intelligent, active, energetic discharge of duty in the school rooms by our teachers; wherever there appears a lack of efficiency in this work, that element should be dealt with summarily by the Board in such a way as will be for the best interests of the sixty little boys and girls who are most interested. We can, however, say to the public that our present corps of teachers is equal to that of any city in the United States, and could the number of pupils in charge of each teacher be reduced, we believe the result of their labors would not be excelled by any.

We have had many theories advanced of late as to the teaching of Moral Ethics in our schools, all of which

are, perhaps, well meant, although some of them come in the form of a complaint that there is not a sufficient amount of moral training in the public schools; but if a close examination is made, it will be found that the fundamental principles of a good moral life are very fully absorbed from the course of training and the books in use, and this too, without the slightest approach to that great apple of discord—sectarianism; on the whole, we have reason to be proud of our system of public schools, and trust that our successors will continue to care for and advance the interests of this system, which is one of the most powerful civilizing influences of the age.

Gentlemen, I now tender to you my sincere thanks for twice electing me to preside over your deliberations, and in retiring from the service of the school department, I hope I merit the reward of leaving it in better condition than when I entered. If I merit that reward, then my compensation is ample indeed.

MARTIN A. DELANY,
President.

REPORT

OF THE

SUPERINTENDENT.

To the Board of Education of the City of Chicago.

GENTLEMEN: The past year has been generally one of quiet, but earnest and successful work. Though, perhaps, presenting little that would strike the careless observer unfamiliar with school life, yet if we could take account of stock in mind and morals, as in merchandise, the showing of the year, we think, would command approval and respect.

The material condition, which alone can be shown with accuracy, can be learned from the following Statistical Statements:

SCHOOL STATISTICS.

SCHOOL BUILDINGS.

*Covers a period of eighteen months.

†Decrease occasioned by the Great Fire of October, 1871.

SCHOOL ACCOMMODATIONS.

The number of sittings at the close of the year was 54,785, an increase of 4,453 during the year.

There were 154 double divisions, or 9,244 pupils who could attend but one session. In the crowded districts these divisions extend through the second and in one instance through the third grade.

The time seems very near, if it has not already come, when, to meet our needs, it will be necessary to purchase improved property for school sites. A wise foresight also in securing school sites in unimproved portions of the city before they shall be appropriated for other uses, will save great expense in the near future.

The proper location of school buildings is of great importance, not only as regards easy access, but with regard to their agreeable and wholesome surroundings. Parents are properly very sensitive about the neighborhood of the schools to which they send their children, and strongly object to the associations of the schools, to which, with the same membership, they would gladly send if but a block or two removed.

With the better heating and ventilation of our newer buildings, and a wiser arrangement of recesses, by which the play-ground shall become a less prominent object of school life, perhaps smaller lots will be found adequate to all our wants. It would seem that our schools should be so directed that the first thought of

the pupil should be of the teacher and of the classroom, rather than of the resumed game and the playmate.

In those parts of the city where so many of the pupils are compelled to leave early in order to engage in some business, that the number in the higher grades is greatly reduced, the system of smaller primary schools, whose pupils can pass to the grammar school, seems to be both wise and economical. These schools, containing as many little ones as should be gathered under one roof, are thus brought nearer their homes, and serve at the same time to recruit the reduced number in the higher grades.

ATTENDANCE.

The total enrollment of the year was 68,614, an increase of 5,473 over that of the preceding year. The average daily attendance was 47,663, an increase of 3,462. The census of last June gives 110,466 between the ages of 6 and 16—55,135 males and 55,333 females. In private schools, there were reported 32,038, leaving less than 10,000 between 6 and 16 who were not in school some part of the year. The same census returns 354 between the ages of 12 and 21 who can neither read nor write.

The per cent. of attendance does not materially differ from year to year, and is probably about as high as should be expected. When a much higher general rate is obtained, it is often the result of an adroit sys-

tem, or a skillful manipulation of records. The old standard questions of how attendance may be improved and tardiness prevented, may well give place for awhile to that of how our schools may be made such that children will be glad to attend, and parents find it for their interest to send them.

It will be seen that the number of double divisions has largely increased, and it is still increasing. Yet this is not an unmixed evil in the present circumstances of our schools. It has been the constant aim, as far as practicable, to associate in these rooms the young, inexperienced teacher with one of successful experience, with whom she may derive that assistance in matters of instruction and discipline which is one of the most important purposes of a training school. And in the first and, perhaps, the second grade, it is the general testimony that there is hardly an appreciable difference in the length of time required for the work of these grades.

DISCIPLINE.

The general spirit and tone of our schools continue to justify the means employed. Those who have been used to the harsher methods sometimes feel at first a little at a loss in difficult cases, but it is the almost unvarying testimony that the quiet, orderly character of our schools has surely improved. And whether believed in or not, the sentiment of society is such that the older modes of discipline can not now be employed.

There were but 93 cases of special suspension for misconduct during the year, which, with an enrollment of 70,000, is not a large per cent. Of those thus suspended, 46 were restored after a month's absence.

INSTRUCTION.

In the work of the school-room the general aim has been in the same direction as during the preceding year,—to get away from the old system of restraint and repression, and attempt rather to awaken and inspire; to supplant the old memorized rule and definition by better understanding and correct use. In this, as in other cities, a great and desirable change has come over the schools within a few years. The educational journals and conventions are less occupied with such questions as,—how to prevent whispering, and are seeking how to interest the pupils in their work, and quicken and develop the reason and intelligence.

MEMORY IN INSTRUCTION.

The memory of course must play an important part during the years of school life, for by its aid alone all reason and intelligence are made possible. And in the various branches of school work, what are the things to be memorized, under what condition, and by what means the memory may best secure the desired results, how its resources may be most wisely and securely invested, and made most available for the future life and progress of their pupils, may well command the frequent

and most earnest thought of every teacher. The average child of six years, already on entering school, has in greater or less completeness, his little vocabulary, sufficient for the needs of his daily life. He has seen the dog, the tree, the bird; has heard and remembered the sounds which we call names; has associated with them the utterances which we designate by *barks*, and *growls*, and *sings*, and laid them one by one away within easy reach in his memory. He has noted the motion of the lips, when others have pronounced these words, and one by one by many an effort has himself mastered the wondrous art, which he has practiced with ever new delight, till now, almost without a conscious effort, the words talk themselves. To him a word is a word, a simple utterance, is what he says, which he has never analyzed, never thought about; and he knows no more why this or that sound stands for this or that thing, or act, than—we do. How he has loved to live and learn! Life has been to him a joy. He has talked, and laughed, and run, and climbed, winning ever some new word, some wisdom, some power, and always some new happiness; and now in the glad pride of his little heart he has come to school; he is a scholar; he is going to learn to read. Those objects, those acts, and those feelings, for which he has learned the sounds, the names, he is now to see represented by marks, by printed, by written characters. The primer, the volume, the wisdom, the poetry of the ages are to be opened and revealed to him, and why should he not be proud and glad?

His first twenty, or forty, or two hundred words are to be memorized, learned, as simple words, mere arbitrary characters for simple sounds, as wholes, and not yet in their parts, one or two to-day, and others to-morrow and the next day. He is to learn to know them, to make them, and become so familiar with them, by seeing, by speaking, and by writing, that the character shall always suggest the sound, the sound the character, all unconsciously, as he has already associated the sound and the object, or act.

A very different thing from chasing butterflies and making mud pies, as he soon finds, is this filling his slate with words only to erase them and fill it again,—that modern combination of pillory and thumbscrew. The lively, eager attention, the first requisite and condition of memorizing, soon gives place to dull and painful listlessness, if not to revolt and lawlessness. Now must the ingenuity, the art, the power of the teacher, like the voice of the Master to the sinking Peter, appear, or he perishes. Instead of the mere repetition, the word must be wrought into sentences alive with a new meaning. The object must be at hand, the picture presented, the perception called into exercise, the little story told and repeated, the intelligence awakened.

In these early days of school life must the thing and the word become forever associated by constant practice. Dull monotony must give way to pleasing variety; the words of yesterday wrought into the

lessons of to-day and to-morrow; the new words of to-day pointed out, written, talked about, before commencing the lesson, or as an introduction to it. Instead of being a stumbling block in the course of his reading, now will the new word glisten like a new coin among its dingy companions, and its easy mastery on the new page fill him with the pride, the happiness of a conqueror.

But the storing of the memory with accumulations of forms and facts is of little use, unless they can be at once and with ease reproduced, and wrought into new creations, with different effects, and for other purposes. The pupil with his learning, must be always using his acquisitions. He must be led to talk, and talk correctly. Very early in his school life does he form those habits that never leave him, even by prayer and fasting. Right here, in the early grade, is determined, whether in his utterance he shall be clear, open, distinct, articulate, correct; or go through grammar and high school, perchance through college and university, with hang-dog air and incoherent mutterings.

Here, by question, and answer, by recital and story, before he can yet busy himself with the printed or written page, he should become familiar with the common forms of speech,—as *man, men; children, child; am, is, are, a, an*,—not by rule, or definition, but by use, in all the variety of their combinations. These are for permanent use, forms that are always used, and by all; and their correct use is all memory and habit,—

habit so confirmed and strong that the effort escapes detection. They should be made ere long so thoroughly a part of himself, that he would no more think of saying—*We is, I done it, He has went, them books*, than of putting his food into his ears.

But no definition; nothing of sentence, asking sentence, telling sentence; no action words, naming words, relation words; no rules. It should, as yet, be all use. He who talks by rule never talks well. Memory, aided by association with some object, or purpose, enlivened by variety and novelty, made reproductive by new applications requiring ingenuity and skill on the pupil's part, is the chief reliance and hope of the lower grades.

This is the receptive period when the underlying material for future upbuilding is to be secured. It is the curious, the observing period, when all is still fresh and new; when the child-thought is ever on the wing from flower to flower, from sweet to sweet, ever bearing too, like the bee, from blossom to blossom, the fertilizing dust that shall make them all hereafter richer of flower and fruit. It is the period too when all objects quickly pall upon the sense.

The fixity of thought, the close observation and comparison, the nice analysis, the weighing and balancing of reasons and probabilities, which are the delight of the trained intellect, play a small part in his young life. His purposes are as fleeting as his laughter, or his tears; there is no place in his nature for mere routine. The memorized rules and definitions have to him no mean-

ing; and to force them upon him is but to send him blindfold into a field of rich and rare products, whose pathways he has not yet learned, and whose beauties he has not yet seen; when, with the bandage removed,

"The wood, the stream, the earth, the skies
Might be an opening paradise,"

As in a gallery of pictured landscapes, there is in each the mead, the hill, the tree, the stream, with a touch of human or animal life, but always in different combination, with varied relations; so should the monotony of dull repetition on the printed page be relieved. The words that are recited and written to-day should be wreathed and woven into other figures and expressions to-morrow, and thus repetition, one of the most efficient means for memory's aid, invested with all the charm of novelty. And when a page can be read with ease, and perhaps repeated without the book, though it may be of some use as a subject for conversation, yet as a reading lesson it has served its purpose and should give place to something else. Its further use is rather to stifle thought, and make of our thinking pupils but prating parrots.

Even upon the most enduring tablets the names and inscriptions become moss-covered and illegible, unless removed by the chisel of some old Mortality, and the lessons of our early school life, without an occasional recall, fade and escape us before the final examination. And with a return in each grade to some preceding principles, some new relation or application can be shown, for which the pupil was not before prepared.

With the lower grades too, as well as with the higher, an escape from monotony, and a livelier interest may be secured by the magnetic attrition and generous rivalry of different minds. Not only in the saving of time, and the multiplying of the teacher's efficiency, but in the quality of the work, a class of ten or twenty is far better than one or two. The wise teacher will seek, of course, to discern and regard the peculiarities of the individual pupils, but individual instruction without the class is almost of necessity inferior instruction. The wealthy may employ the private tutor in the home, but at the sacrifice of the full rounded training that results from the contact of mind with mind. The suggestions of another's reading or recitation, the quickening of the intellect, the alertness of thought in detecting errors, the skill and power of expression in making proper corrections, these are often quite as valuable as the teachings of the book.

When the pupil has become so familiar with most of the common words and their uses, that he can detect them at a half glance, as he can his dog, his book, or his brother, and those ever recurring forms, as *a, the, of, to, for, but, and*, have almost ceased to seem as separate words; when his thought can run forward like an advanced guard ahead of his utterances, to remove all hindrances from his way, he is prepared to gather the richer treasures strewn along his route, to grasp the thoughts that had been hidden within those mastered sentences. Then may he take the thought from its

old setting, and fit it to other uses; from the recorded deed deduce the character, from the plan the secret purpose.

We sometimes blame our children for reading books for the story; and yet if the story be worth the reading, is it not a useful art? In the multitude of things to be read, is it not a worthy aim, to be able to give the substance of a page from a single reading, a rapid but close survey?

And in numbers, too, it would seem that much of the work in the earlier grades is rather a matter of memory than of mathematics. The child of a year knows that he has more thumbs than mouths; and at three, that a whole apple is more than a half. Nine and three? Seven! is generally an ignorance of words rather than of numbers. Place nine cents and seven cents before him, he does not choose the seven. As in learning to read, so here, the short but oft repeated exercise, the small daily accretions, the introduction of blocks, cards, lines, figures on the blackboard, making the numbers the means to some end, or purpose,—these, and many other expedients, may furnish variety and pleasure. The multiplication table can, perhaps, be learned as quick, and possibly quicker, by simply memorizing words without objects; but in the first attempts the words need to become so closely associated with the things that they shall be inseparable in the thought, that six shall be six somethings.

LANGUAGE.

Increasing attention to ready and correct use and practice, free from all theory and technicalities, has been given to language, the most important of all subjects, perhaps, for the young beginner. The instruction has not been entirely uniform throughout the schools, but the study is being introduced probably as fast as is desirable. It can not be done in a hap-hazard or perfunctory manner, but requires thought and preparation on the part of teachers; and it has been gratifying to see the readiness with which they have entered into it. In many cases very marked and desirable results have been observed, in an eager interest, a quickened intelligence, an alertness of thought and a facility of expression. This work has been done without the use of any common text-book, though in many cases teachers have been provided with one or more books of reference either by the Principals, or often at their own expense. Indeed, a text-book in the hands of the pupils would be destructive of the whole design of the work.

Much has also been done in furnishing material and directing the reading of pupils in the higher grades. Some of the time formerly assigned to the time-honored declamation has been given to discussions of authors thus read. The chief aim in the instruction in reading has been, not at rhetorical effect by continued drill upon a few selections, but to enable the pupil

readily to grasp the thought at sight, and give it clear and intelligent expression, whether from the school reader or from magazine or newspaper, and to cultivate a desire for good reading.

OPTIONAL STUDIES.

From the report of the Committee of German it will be seen that the study has been attended with increased interest and success. The natural method has been generally introduced for beginners with much pleasure and profit to the pupils, and is equally desirable in the study of German or English.

There seems to be also a gratifying increase of interest in drawing, especially in the higher Grammar Grades and in the High Schools in the desirable direction of industrial and mechanical drawing. The value of this training of the eye and hand, to say nothing of the mental training and development involved, whatever be the future employment of the pupil, is not likely to be over-estimated.

In singing, the interval system has been generally employed. To those who have long associated the different tones and intervals with the *do, re, mi*, their disuse is undoubtedly attended with inconvenience, and had better not be attempted.

With beginners, however, the case is different, and though with so large a field the work must be principally done through the class teachers, they have

engaged in it with such good will that it may be safely said, never has greater progress been made, or better results secured. Effort has been made toward providing more songs that may be available in the homes of the pupils, but was begun too late to accomplish all that seems desirable. It is to be hoped that early steps may be taken to secure a suitable collection for another year.

HIGH SCHOOLS.

The mode of admission to the High Schools upon the recommendation of the Principals, supplemented by the Superintendent's examination, was again adopted last year, apparently with equally satisfactory results. By the revision of the rules, the special Two Years Course was discontinued, and certificates were granted to those who completed two years of the General Course. The good effect of the re-organization of the High Schools begins to be seen in the larger number of those who complete the full Four Years Course. As most of our young teachers receive their education here, four years does not seem too much, whether we regard the scholarship, or the maturity of character of those to whose care the early years of so many of the children of our city are entrusted.

The character of our High Schools, both in quality of instruction and of strong moral influence seems to have been fully sustained, though we are glad to know that they have ceased to be the only ones in which the sound of blows has never been heard.

TEACHERS EXAMINATIONS.

Two examinations of candidates for positions as Assistants in Grammar and Primary Schools were held, —in July, and in November. Of those present, 72 were successful, most of whom have been assigned to positions. There were seven successful applicants for positions as Principals, and Assistants in High Schools. The questions prepared for these examinations were designed, as far as might be, to test rather the intelligence and general culture of the candidates, than their knowledge of any particular text-book, or their familiarity with the methods of any school. As the number of those previously waiting for positions has been much reduced, it may be found desirable to hold more frequent examinations hereafter.

The most of our teachers come, of course, from our own schools, but in several instances we have been fortunate in securing the services of teachers of experience, and assured success from abroad. Experience is very desirable, but time spent in the school room hardly deserves the name, when its only effect has been to deepen some old rut, or strengthen some vicious habit.

EVENING SCHOOLS.

Evening schools were opened in nine of the school buildings, besides the High School and the Newsboys' Home.

Owing to the large number of rainy nights during the Autumn months, the average attendance, as compared

with the total enrollment was less than that of the previous year. The character of the work, however, showed a marked improvement. In the High School, classes were formed in Algebra, Geometry, Natural Philosophy, Chemistry, Book-keeping, Mechanical Drawing, and Short Hand, the largest classes being those in Short Hand. In the other schools instruction was limited to Reading, Writing, Spelling, Arithmetic and some miscellaneous information. The schools commenced October 3, and continued till January 27, though the attendance rapidly diminished after the holidays.

In closing, I desire to express my grateful appreciation of the cheerful and hearty co-operation of Principals and Teachers, by which the labor of supervision has been lightened, and the work of our schools so harmoniously and successfully promoted.

GEORGE HOWLAND,

Superintendent of Schools.

In Memoriam.

During the year, six names were added to our Honored Roll:

MAGGIE L. NICKSON,

Assistant in the Polk Street School, October 17, 1882.

She graduated at the West Division High School in 1877, and was assigned to the Polk Street School in September, 1881. Though her service was short, yet it was long enough to show her faithful and conscientious endeavor.

LAURA R. A. PENNELL,

Assistant in the Burr School, December 25, 1881.

Miss Pennell was educated in Rochester, N. Y., and appointed in our Schools March, 1868. Elected as teacher for the year, she was compelled by ill health to ask for leave of absence during the first Term, hoping then to resume her loved work.

MAGGIE G. BATES,

Assistant in the Washington School, January 11, 1882.

Graduating from the City Normal School in 1871, Miss Bates was appointed in August of the same year,

and labored with fidelity and ever increasing success, till called to her reward.

FLORA W. COOPER,

Assistant in the Third Avenue School, January 30, 1882.

She graduated at the Normal School in 1874, and received her appointment September, 1875, and honored herself and her calling by her cheerful, kindly and earnest efforts.

ELLEN GIBBONS,

Assistant in the Pearson Street School, May 28, 1882.

Of the Class of 1875 in the Central High School, Miss Gibbons was appointed in January, 1876. The zeal and success of her school life went with her into her chosen work as a teacher. Hoping against hope for renewed health and strength, she remained at her post almost to the end.

JEREMIAH MAHONY,

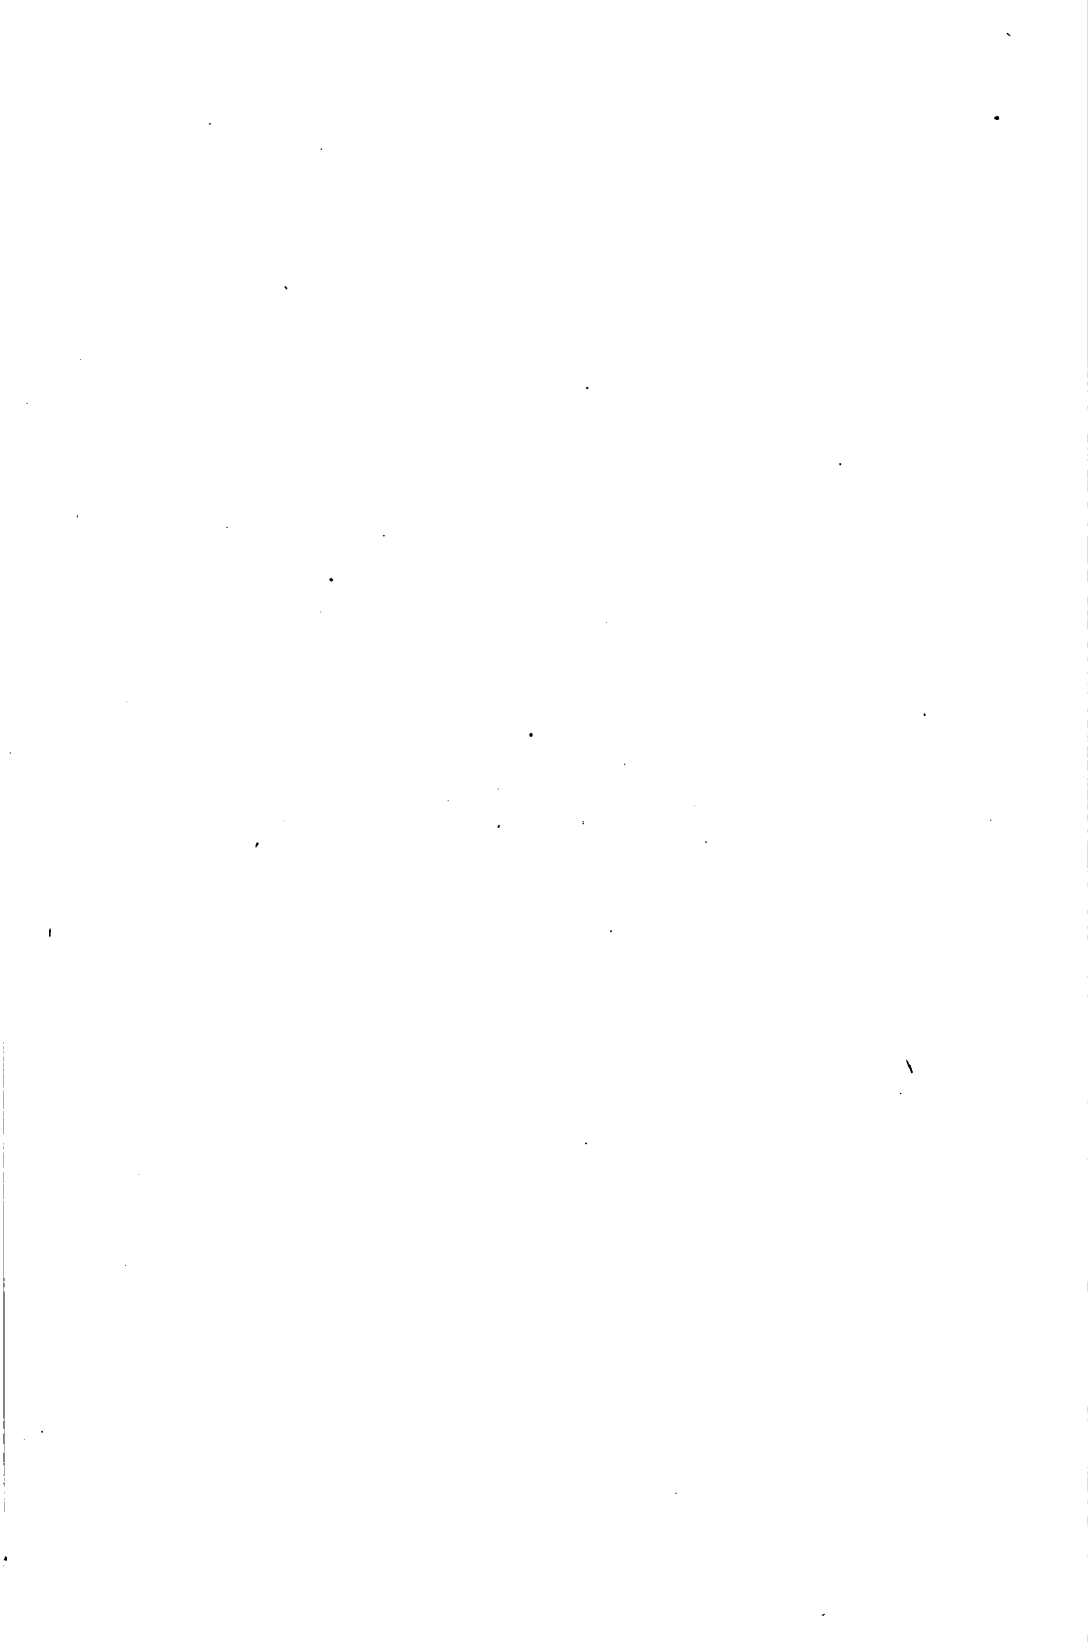

Principal of the Washington School, July 22, 1882.

Mr. Mahony was one of the early graduates of the Chicago High School, of the Class of 1861. In 1864 he was elected Principal of the Wells School, where he remained till 1875, when he was transferred to the Washington School. With an interval of two years, from 1879 to 1881, he held this position till his resignation in April, 1882. Thoroughly devoted to the Public

School System and jealous for its welfare, brilliant and skillful alike with tongue and pen, judicious in management, and considerate of his teachers and pupils, he left behind him many a loving and saddened heart.

**"The treasure looks we can not find,
The words that are not heard again."**

REPORTS OF STANDING COMMITTEES.

REPORT OF COMMITTEE

ON

BUILDINGS AND GROUNDS.

To the Board of Education of the City of Chicago:

GENTLEMEN:—The subject of the present and future needs in the matter of school accommodations for the City of Chicago is a problem not easy of practical solution in consequence of the large annual increase in the number of her population—an increase almost phenomenal in the history of the country. The School Census of 1878 gives as the total population of the city, 432,343, and for 1882, 560,693, an increase of 128,350 in four years. The same authority enumerates the population under 21 years of age in 1878, 201,709, and for 1882, 241,693, an increase of 39,984. The school population between the ages of six and sixteen years is stated for 1878 to be 87,819, and for 1882, 110,389, an increase of 22,570. Taking the present school population between the ages of six and sixteen, which is the nearest average of school life, it will be found that of this number 32,038 are accommodated in private or parochial schools, leaving 78,351 to be provided for in our public schools. To accommodate this number of pupils, which it must be borne in mind is annually

steadily increasing, we have, including the buildings now under construction, 68 public school buildings owned by the city with an aggregate capacity for pupils, of 55,000 seats.

It seems to your Committee that the foregoing facts conclusively demonstrate that it is the manifest duty of the Board of Education, aided by the City Council, to speedily provide for the very large surplus in our school population, for which, at present, no accommodation at all exists.

SCHOOL SITES.

In this connection, your Committee direct the serious attention of the Board to the increasing difficulties of obtaining property for school sites in well settled districts where schools are at present most needed. The objections of property owners adjacent to lots selected for school sites seems to have more weight with the City Council than the pressing needs of an increase in school facilities for that locality.

It appears to your Committee that unless some change in this respect is made by granting the power to the City Council, upon the request of the Board of Education, to condemn property required for school purposes, the further erection of school buildings must be restricted to sparsely settled portions of the city where, at present, they are least wanted. Your Committee would specially direct the attention of their successors in office to the importance of securing sites for

the erection of buildings to relieve the overcrowded condition of the Pickard, Hayes, Brown, Elizabeth Street, Ogden and Douglas School buildings, as well as to the present condition and future prospects of the Jones, Third Avenue, and Polk Street School buildings.

Of school sites owned by the city, prior to August 1st, 1881, considered available for the erection of buildings, the lots on the corners of Wells and Wendell Streets, and of Wabash Avenue and Twenty-sixth Street alone remain unimproved at the close of the present school year.

Since the commencement of the year the Board, upon recommendation of your Committee, have requested the concurrence of the City Council in the purchase of the following property for school sites:

Throop Street, west front, Lot 210 x 125.5, at a cost of.....	\$ 7,875
Lexington Street, south front, Lot 192 x 125, at a cost of.....	8,000
Wentworth Avenue and 33rd St., Lot 200 x 125, at a cost of.....	8,000
Paulina and Walnut Sts., Lot 200 x 112.4, at a cost of.....	21,500
Illinois and Cass Sts., Lot 150 x 109, at a cost of.....	33,000
Ashland Ave. (adjoining Wells School lot,) Lot 56.5 x 130, at a cost of.....	2,260
State St., (adjoining Ogden School lot,) Lot 82 x 39.5, at a cost of.....	7,380

The City Council have confirmed the purchase of the Throop St., Lexington St., and Wentworth Avenue lots; have refused their assent to the purchase of the Paulina St., and the Illinois St. lots; and no action has yet been had in reference to the Ashland Avenue and the State St. lots.

The lot on the northwest corner of Archer Avenue and Fuller Street, formerly occupied by the Archer

Avenue School, was, during the past year, with the concurrence of the City Council, sold to James Maher, for the sum of \$14,100 in cash.

The City still owns, unimproved, the Lime Street and the Warren Avenue school lots, and your Committee recommend that early action be taken towards the sale of said lots, and that the proceeds be made available for building purposes.

SCHOOL BUILDINGS.

Your Committee, on assuming their duties at the commencement of the year, found the following school buildings in various stages of completion, which, under the direction of the Committee, have since been completed and occupied for school purposes, as follows:

SCHOOL BUILDINGS.	No. of Rooms.	SEATING CAP. OT.	COST OF BUILDING.	COST OF HEATING.	COST OF FURNITURE.	TOTAL COST.	WHEN OPENED.
Huron Street...	12	756	\$ 34,668 37	\$ 5,100 00	\$ 1,741 85	\$ 41,509 22	Sept. 3, 1881.
Sheridan.....	15	945	41,633 00	6,945 00	3,139 05	51,717 05	Nov. 28, 1881.
W. Jackson St.	15	945	40,470 00	7,125 00	3,223 80	49,818 80	Jan. 3, 1882.
Wicker Park...	15	945	40,338 00	6,875 00	3,288 50	50,501 50	Jan. 3, 1882.
Garfield.....	12	756	34,766 75	2,150 00	2,179 83	39,096 58	May 8, 1882.
Total.....	69	4,347	\$191,871 12	\$ 28,195 00	\$ 12,573 08	\$232 639 15	

In addition to the above, upon recommendation of your Committee, the Board have authorized, during the year, the erection of school buildings on the following named school lots:

LOCATION.	No. of Rooms.	SEATING CAPACITY.	DATE OF AWARD OF CONTRACTS.	COST.
Central Park Ave. and 25th St....	8	504	April 27, 1882.	\$27,454.25
West 20th St. near Halsted St....	12	756	April 27, 1882.	36,078.45
Sangamon and Indiana Sts.....	12	756	July 6, 1882.	39,319.70
Throop St., near West 20th St....	12	756	July 6, 1882.	40,761.80

The above buildings are expected to be ready for occupation by January 1st, 1883.

Plans and specifications, authorized by the Board, are also being prepared by the Architect and Superintendent of Construction, J. S. Ender, Esq., for the erection of a fifteen-room building on the Wells and Wendell Street lot, and an eighteen-room building on the lot corner of Wabash Ave. and Twenty-sixth Street.

Of buildings, in occupation by schools at the beginning of the year, August 1, 1881, there have been sold during the year and removed from the lots:

2 Frame Buildings, Wicker Park School, sold Jan. 16, 1882, for....	\$1,250
1 Frame Building, Warren Avenue School, sold March 9, 1882, for.	385
1 Frame Building, Sangamon Street School, sold June 22, 1882, for.	30
1 Brick Building, Sangamon Street School, sold June 22, 1882, for.	480

HEATING AND VENTILATION.

In consequence of the old style furnaces in the Calumet Avenue School building having become unfit for further use, your Committee, after careful investigation of its merits, were induced to adopt, as an experiment, the Ruttan system of furnace heating for this building. The success attending the experiment was such as to induce your Committee to adopt this method of heating and ventilation for use in the Garfield School building, and, subsequently, for the Lawndale, West Twentieth Street, Sangamon Street and Throop Street buildings now in course of erection. Notwithstanding the unusual mildness of the past winter prevented any severe test of the capacity of this system to thoroughly heat and ventilate our school buildings, your Committee are of opinion, from observation and enquiry, that the system will

prove a decided success. The first cost of construction, as well as the annual expense of maintenance, is fully fifty per cent. less than heating by steam, a saving of very considerable importance in the expenditures of the Board.

Contracts have been awarded by the Board, on recommendation of your Committee, for the reconstruction and improvement of the steam heating apparatus of the Skinner, Lincoln, Wells and Holden School buildings at an aggregate cost of \$20,050.

RENTED BUILDINGS.

In addition to the premises rented and occupied for school purposes at the beginning of the school year, the Board have since authorized the leasing of rooms for use of a Branch of the Ogden School in the North Clark Street Turner Hall building, and for Branches of the Throop School in building No. 581 Center Avenue, and in the Bohemian Hall building, No. 400 West Eighteenth Street.

The following rented premises have been vacated during the past year, being no longer required for school purposes:

Church Building, Wright and Johnson Sts.,	} Closed by opening of Gar-
Church Building, Maxwell Street.	
Church Building, Hoyne Avenue.	} Closed by opening of Wick-
Building, 141 Evergreen Avenue.	

The following is a statement of rented buildings occupied for school purposes now under lease to the Board, some of which can be discontinued upon the opening of buildings now in course of erection:

SCHOOLS.	PREMISES OCCUPIED.	Lease Expires.	Annual Rent.	Seating Capacity.	Can be Closed on Opening of
Central Park Br....	Building, cor. of Springfield Ave. and Kinzie St.....	July 1, 1883	\$ 240	64	
Lawndale	Church, Millard Ave	Jan. 1, 1883	450	123	Lawndale.
Walsh St. Branch	Building, 696 So. Halsted St.....	Jan. 1, 1883	720	128	Walsh.
Kinzie Branch	Building, 257 East Kinzie St.....	July 1, 1883	504	100	
Dore Branch.....	Temperance Hall, Harrison St.....	July 1, 1883	720	240	
Humboldt Park Br. of Wicker Park..	Church, Hirsch and Seymour Sts	July 1, 1883	168	50	
Throop Branch.....	Building, 581 Center Ave.....	Jan. 1, 1883	325	215	} Throop & 20th St.
Throop Branch.....	Bohemian Hall, Eighteenth St.....	Jan. 1, 1883	480		
Ogden Branch.....	Turner Hall, North Clark St.....	July 1, 1883	450	120	
Total, Nine Buildings.....			\$4,057	1040	

PERMANENT IMPROVEMENTS.

Improvements and additions of a permanent character have been made during the year to the various school buildings, as follows:

Addition to boiler houses and enlargement of smoke stacks of the Holden and Wells School buildings.

Re-building brick water closet building on Ogden School lot.

Re-building outside entrance steps of King, Burr, Nickersonville, and Vedder Street School buildings.

Cement Paving basement floors of Lincoln, Hayes, Burr, Dore, Wells, Brown, Throop and Franklin School buildings.

Construction of sewers and inside water closets on approved principles in the basements of the Brown, Lincoln and Dore School buildings.

Laying new floors in the Skinner, Newberry and Foster School buildings.

Laying new shingle roof on the Elizabeth Street, Wentworth Avenue, Holstein and Walsh School buildings.

Construction of pipe sewers at the Holden School building.

Filling and grading the lots of the Sheridan, Wallace Street, Huron Street, West Jackson Street, Wicker Park, Garfield, Pickard, Lincoln Street, Elizabeth Street, Carpenter, and Brighton Schools.

GENERAL REPAIRS.

A large amount of general repairs to buildings and grounds, consisting of painting, calcimining, repairs to roofs, sidewalks and fences, has been done during the

past year and much more remains to be done to put our school premises in substantial repair.

WILLIAM CURRAN,

WILLIAM FLOTO,

JAMES T. HEALY,

Committee on Buildings and Grounds.

REPORT OF COMMITTEE

ON

FINANCE AND SALARIES.

Your Committee on Finance and Salaries respectfully present their report in detail of the expenditures on account of the Board of Education for the School Year ending July 31, 1882, as follows :

SCHOOL TAX FUND.

SALARIES—

		<hr/> \$16,700 00

Your Committee also submit a statement of the amount now invested on account of the Principal of the Jonathan Burr Fund, the revenue from which is applicable to the purchase of books of reference, apparatus, works of art, text-books, etc., for the use of Schools:

Amount of Principal of Burr Fund for use of Schools.....	\$19,671 09	
Amount transferred from Income Account.....	328 91	
		<hr/> \$20,000 00

INVESTED AS FOLLOWS:

7 City Chicago Seven per cent. Bonds.....	\$7,000 00	
2 City Chicago Six per cent. Bonds.....	2,000 00	
17 Cook County Five per cent. Bonds.....	11,000 00	
		<hr/> \$20,000 00

It will be noticed from a comparison of our ordinary expenditures during the past year with those of the previous year, that they have been kept nearly as low or lower in all the items except that of salaries, in which case the additional number of teachers required, and the higher cost of living has compelled a larger appropriation.

We trust that the wise economy heretofore so faithfully adhered to, will be exercised hereafter by the Board.

We deem it not out of place to mention the faithful services of all our office employes in the performance

of their duties, and more especially those of Mr. M. B. Hicks in the responsible duties of Business Agent, to which he was called upon the death of Mr. James Ward, and to whom he has proved a most worthy successor.

PHILIP A. HOYNE,

THOMAS BRENNAN,

E. G. KEITH,

Committee on Finance and Salaries.

REPORT OF COMMITTEE ON EVENING SCHOOLS.

To the Board of Education of the City of Chicago.

GENTLEMEN: The Evening Schools were opened on Monday, October 3, 1881, and remained in session sixteen weeks, closing on Friday, January 27, 1882. Schools were held in the same buildings as during last year, with the addition of the King School building in the West Division of the City.

The following tabulated statements will show the attendance at each of the schools, cost, etc.:

SCHOOLS.	NUMBER OF SESSIONS.	TEACHERS.		PUPILS.

Advanced Mathematics, Book-Keeping, Chemistry, Mechanical Drawing and Stenography were taught in the Evening High School.

There were two classes in Book-Keeping and two classes in Stenography, the pupils of which attended on alternate evenings. The studies of Chemistry and Mechanical Drawing were also taught on alternate evenings, and the class in Mathematics met three evenings per week.

The average attendance and the cost per pupil for the Evening High School are made up on the same basis as the other Evening Schools, that is the number present each evening, but inasmuch as most of the pupils were due only on alternate evenings, justice to the school and to the pupils demands this explanation, and the further following statement of the average attendance and cost per pupil based upon attendance on the evenings when the pupils were due to pursue the studies they had selected, to-wit:

WEEKS OF SESSION.	AVERAGE ATTENDANCE.					
	CLASS IN MATHEMATICS.	CLASSES IN BOOK-KEEPING.	CLASSES IN STENOGRAPHY.	CLASS IN CHEMISTRY.	CLASS IN MECHANICAL DRAWING.	GENERAL AV. FOR THE WEEK
First.....	12.7	30.0	62.2	2.7	3.0	110.6
Second.....	10.7	39.0	61.3	10.7	8.0	129.7
Third.....	11.0	43.0	56.7	12.7	6.0	129.4
Fourth.....	11.3	45.3	62.5	16.0	9.5	144.1
Fifth.....	11.0	40.7	52.5	27.0	11.5	143.7
Sixth.....	10.0	33.3	53.5	11.3	13.0	121.1
Seventh.....	8.3	42.0	57.3	8.7	11.0	127.3
Eighth.....	8.0	38.0	65.0	10.5	14.0	135.5
Ninth.....	8.7	42.2	72.2	24.3	14.0	161.4
Tenth.....	5.0	39.2	74.0	8.0	13.5	139.7
Eleventh.....	4.0	31.0	50.3	3.7	12.0	101.0
Twelfth.....	4.3	29.7	59.7	15.0	13.0	121.7
Thirteenth.....	1.0	22.5	56.0	15.5	10.5	106.5
Fourteenth.....	3.7	21.8	56.8	15.0	9.5	106.8
Fifteenth.....	5.3	41.5	52.4	16.7	12.5	128.4
Sixteenth.....	4.0	47.7	78.5	16.3	6.5	153.0
Total.....	7.6	36.7	60.7	13.4	10.5	129.9

The cost per pupil for the Evening High School, on the above basis, would be \$8.93.

The school for the News Boys was held in the News Boys Home, the room, fuel and light being furnished free of expense to the city. This will account in a measure for the low cost per pupil in this School as compared with the other Evening Schools.

Committee on Evening Schools.

REPORT OF COMMITTEE

ON

GERMAN.

To the Board of Education of the City of Chicago.

GENTLEMEN: Your Committee on German presents herewith their annual report for the year ending June 30, 1882:

Since our last annual report the study of the German language has made considerable progress in the schools, and the efficiency of the instruction has increased to an extent highly gratifying to your Committee and to all who recognize the liberalizing tendency of the study of languages.

During the year, instruction in the language has been introduced into the Armour Street and the Sheridan Schools, thus leaving only the Holden, Oakley, Throop, Wallace Street, West Jackson Street, Central Park and Lawndale Schools in which the study has not been introduced.

The total number of pupils enrolled in the various classes during the year covered by this report, was 5,322 against 4,827 during the preceding year, an in-

crease of 505 pupils. Of this number 4,966 belonged to Grammar Grades and 366 to the High Schools.

Comparing the number of pupils studying German in the Grammar Schools with the whole number of pupils in the Grammar Grades, we find the number in the Grammar Grades to be 8,822; of these the number studying German was 4,186, making a percentage of 48, or nearly one half. In making this comparison the average daily membership for the year has been taken.

For a detailed statement, see the accompanying Table:

SCHOOLS.	Grades in which German is Taught.	Number of Pupils in these Grades.	Average No. of Pupils Studying German.	Per Cent. of Pupils Studying German.
Jones	5, 6, 7,	162	77	47
Scammon	5, 6,	158	74	47

Pickard	5, 6, 7, 8,	77	77	100
Nickersonville	5, 6,	114	96	84
Raymond	5, 6,	133	55	41
Marquette	5, 6, 7, 8,	365	135	37
LaSalle	5, 6, 7, 8,	277	209	75
Armour Street	5, 6, 7,	232	70	31
Sheridan	5, 6, 7,	216	200	92
Total		8,822	4,186	48

In order to show the proportionate number of pupils

studying German in the several grades of the Grammar Schools, we submit the following statement:

Total Av. Membership of Pupils Studying German.....	4,186
	Number of Pupils Studying German. Per Cent. of Total Number.
Fifth Grade	2,184 50.
Sixth Grade	1,225 29.
Seventh Grade.....	732 17.5
Eighth Grade.....	95 8.5

The growth of this department of instruction since the introduction of the study is shown in detail in the following Table:

SCHOOL YEARS.	Number of Schools in which German was Taught.	Number of Teachers of German.	Average Number of Pupils Studying German.	Increase. Per Cent. of Increase.	Decrease. Per Cent. of Decrease.	Largest Number of Pupils Studying German During the Year.
1865-66	1	1	115	---	---	---
1866-67	4	4	700	585	508	---
1867-68	5	5	1,265	565	31	---
1868-69	7	6	1,782	517	41	---
1869-70	9	8	2,597	815	45	---
1870-71	12	11	4,207	1,610	62	---
1871-72	12	12	2,359	---	1,848	46
1872-73	13	12	2,734	365	15	---
1873-74	13	12	2,094	---	30	1
1874-75	15	14	3,359	665	25	---
1875-76	15	14	1,706	---	1,653	49
1876-77	15	14	1,856	150	9	---
1877-78	16	15	1,912	56	3	---
1878-79	18	17	2,308	396	20	---
1879-80	20	20	2,370	62	2	2,750
1880-81	29	30	3,981	1,611	68	4,546
1881-82	30	35	4,186	205	5	4,966

A continuous increase is shown for the successive years, except for the school year 1871-1872, when the effects of the Great Fire caused a decrease; for the year 1873-1874, resulting from the financial depression; and for the year 1875-1876, at which time the study was restricted to the Grammar Grades.

As a result of a discussion as to the desirability of introducing the study of the language in the grades below the grammar grades, the whole matter was

referred to the Committee on German for investigation. The report of the Committee is given herewith as presenting in the clearest and briefest manner possible the result of their deliberations:

At the regular meeting of the Board, held June 30, 1881, Mr. English introduced the following:

WHEREAS—It is the present policy of this Board to allow optional studies to be pursued in grades below the High Schools: and

WHEREAS—Such studies should be pursued in such a manner and in such grades as will produce the most practical results, and the least possible interference with the regular studies: and

WHEREAS—There is a question as to whether a change in the method of instruction and the grading of German may not be made with advantage:

Therefore, it is moved—That the matter be referred to the appropriate committee to investigate the subject, and report to this Board in time for action thereon before the beginning of the new School Year.

This question, on motion of Mr. Curran, was referred to the Committee on German.

This Committee, as re-organized, after very careful consideration of the whole subject, beg leave to submit the following report, suggesting improvements which they think may be made in the present system with great advantage to the character of the work done, and which, if adopted, will render the system more complete as a whole.

It is a well established fact that a child can hardly begin the study of a language too soon. The memory chiefly is exercised, and children of tender years learn words more readily than those of mature years. We would therefore recommend that the present limitation of instruction in German to the Grammar Grades be abolished, and that it be permitted in the third and fourth grades. The instruction in these grades should be entirely oral, and should be of a practical character. In regard to the feasibility of the introduction of this study into the lower grades, we have no doubt. The Special Teacher of German made a practical application of the suggestion here made, in the Marquette School. A class of children, of English parentage, who knew nothing of German, were given oral lessons from a picture which had been selected with a special view of introducing simple sentences in a systematic manner, gradually leading on to a knowledge of more difficult sentence building. The result has been most gratifying even for the short time during which the experiment has been in progress; so much so indeed, that pupils studying German in the upper grades have been eager to be instructed in the same manner, in order that they might also be able to speak the language.

From a careful review of the work of our Teachers of German, we find that by withdrawing those who are assisting in English studies, and giving them employment exclusively in teaching German, and by proper combina-

tions which may be made, little or no increase in the number of Teachers of German would be required in order to give the instruction suggested, in the lower grades, beginning at least not later than the fourth grade.

The adoption of what is known as the "*twenty rule*" has almost excluded instruction in German from the Eighth Grade, and in some schools from the Seventh Grade, thus breaking the connection between the Grammar and the High Schools, and greatly hindering the classification of pupils in the High Schools. Pupils who wish to study German in the High Schools are in different stages of advancement; some wish to begin the study, others have had the benefit of instruction through the Grammar Grades, and still others were forced to drop the study of German in the Eighth or even in the Seventh Grade, owing to the rule above mentioned. It is evident that no efficient classification can be made of such diverse material. The instruction given would be too advanced for some, and too simple for others, thus producing either indifference or discouragement. If instruction were introduced earlier in the Course, as suggested, less time would be needed in the upper Grammar Grades, and the knowledge already gained would be kept fresh in the mind with very little addition to the Eighth Grade work. When pupils entered the High Schools, the classification would then naturally be made of those who had studied German, and of those who had not. Of course, in order to carry out these suggestions, the limitation to twenty of the number of pupils necessary to form a class, which now exists, would have to be abolished; the instruction in the Eighth Grade, however, with the preparation here pre-supposed could be carried on quite efficiently by limiting it to three days per week. It should also be borne in mind that this rule at present affects only the upper grades, as there is always a sufficient number of pupils pursuing the study in the fifth and sixth grades to insure instruction there. The repeal of this rule would therefore not affect the condition of the instruction in German except to permit it to be kept up uninterruptedly through the Grammar School Course. In our opinion, the adoption of such a plan would naturally lead to increased numbers in the upper grades. The connection with the High Schools being now broken, leads many to drop German who would continue the study were there a prospect of an uninterrupted course through the Grammar and the High Schools.

By the adoption of the above suggested modification of our present system we are confident that pupils completing the course would be enabled to converse in German, a language which, aside from being a means of culture, is every day becoming of more practical importance in this country.

We would therefore offer the following resolutions embodying the proposed modifications:

Resolved—That the rule requiring at least twenty pupils in a grade before instruction in German can be given, be rescinded.

Resolved—That instruction in German be permitted to begin in the Third and Fourth Grades.

The recommendations of the Committee as presented in the two resolutions concluding the report, were not

adopted. We trust that in the future the importance of these suggestions will be fully recognized by the Board, and that the instruction in the language will begin earlier when the power of memorizing is most vigorous; and that the restrictions as to the number required to form a class, will also be removed.

The following Table will show a similar gratifying increase in the number of pupils studying German in the High Schools:

SCHOOL YEARS.	NORTH DIV. H.			SOUTH DIV. H.			WEST DIV. H.		
	Whole Number Enrolled.	No. Studying German.	Per Cent. of Pupils Studying German.	Whole Number Enrolled.	No. Studying German.	Per Cent. of Pupils Studying German.	Whole Number Enrolled.	No. Studying German.	Per Cent. of Pupils Studying German.
1875-76.....	96	21	22	228	62	28	394	52	15
1876-77.....	149	24	16	308	74	24	358	64	18
1877-78.....	209	29	14	312	76	25	587	73	13
1878-79.....	187	24	13	330	79	24	610	104	16
1879-80.....	213	25	12	362	82	22	602	96	16
1880-81.....	225	75	33	368	105	30	643	74	11
1881-82.....	297	136	43	391	96	24	689	114	16

It is worthy of note that many of our most successful teachers of German in the Grammar Schools are graduates of the High Schools, having studied the language there.

The Committee would call attention to the tabulated statement on page 90, showing the condition of Instruction in German during the past year.

The parents of the pupils studying German in the Pickard School again made up a purse at the close of the school year as they had done for the two preceding years, the amount of which was to be distributed as

premiums to the five pupils ranking highest in the study of the language.

Respectfully submitted,

CONRAD L. NIEHOFF,

F. A. E. MAASS,

WILLIAM FLOTO,

Committee on German. •

REPORT OF COMMITTEE
ON
DEAF MUTE SCHOOLS.

To the Board of Education of the City of Chicago.

GENTLEMEN: The Committee on Deaf Mute Schools, at the close of another school year, present the following report of the schools for the instruction of Deaf Mutes, for the past year.

The schools have been held in the same buildings and have been under the charge of the same teachers as during the school year 1880-81.

The total enrollment of pupils during the year has been 57—twenty-nine of whom were males and twenty-eight females.

Twenty-four of these pupils have been members of these schools for the past three years, and were in attendance at the close of the year; eight of whom were members of the Advanced Class, three of the Scammon School, two of the Division and Cleaver Street School, five of the Third Avenue School, and six of the Menominee Street School. In addition to these twenty-four pupils, five, who had been members of the schools since 1879, left during the year.

The following tabulated statement shows sundry items of attendance for each of the Schools.

SCHOOLS.	Total No. Enrolled			TIME OF ENTERING.								No. Left School During the Year.	Total Number of Days Attendance of Pupils.	Average Number of Days Attendance per Pupil.

Of the four who were present less than twenty days, or one school month—one entered in April and died before the close of the year, and three commenced at the

opening of the schools in September and left before the close of the month.

Of the two who were present between 20 and 30 days—one entered May 23 and remained to the close of the year, and the other entered September 12 and left October 24.

Of the three who were present between 40 and 50 days—one entered March 8 and remained to the close of the year, one entered September 12 and moved from the city in November, and the other commenced at the opening of the Schools in September and left November 27.

The pupil present between 60 and 70 days entered September 19 and left at the close of the first term, in December.

The ages of pupils enrolled during the past year is shown by the following statement:

SCHOOLS.	Between 6 and 7 Years.	Between 8 and 9 Years.	Between 9 and 10 Years.	Between 10 and 11 Years.	Between 11 and 12 Years.	Between 12 and 13 Years.	Between 13 and 14 Years.	Between 14 and 15 Years.	Between 15 and 16 Years.	Between 16 and 17 Years.	Between 18 and 19 Years.	Total.

The studies pursued during the year have been the same as during the preceding year, with the addition of

a short exercise in *Morals and Manners* on Friday afternoon of each week, on which the pupils were questioned on the succeeding Monday. This has proved a very instructive feature of school work for the pupils, and the exercise was looked forward to by them with very great interest. Even the youngest children seemed all attention, as the subjects and ideas were new to them, and they showed their interest in the subject by frequent manifestations of delight.

During the month of January, one of our Teachers, Miss Grace D. Emery, was granted leave of absence, to attend a course of instruction in the "Articulate Method" of Teaching the Deaf and Dumb, given at the Wisconsin Institution for the Education of Deaf and Dumb, and upon her return a class was organized, consisting of such members of the Advanced Class and of those attending the Scammon School as desired to avail themselves of this method of instruction, who made very fair progress during the time they devoted to the work. It is the intention of Miss Emery, immediately upon the close of the schools, to proceed to Boston for the purpose of further perfecting herself in this method at the "Bell Visible Speech Institute" in that city, and thus become better fitted for the work for another year. The instruction was given to this class after the regular school hours, so as not to interfere with the regular course of study. While this method of instruction may succeed to a limited extent in a certain number of cases, we do not consider that it will

by any means ever supplant the Manual System of instruction.

The expenditures for the support of these schools during the year have been, as follows:

Cash on hand July 31, 1881.....\$7,663 85

EXPENDED—

For Salaries of Teachers.....	\$3,819 50
For Salaries of Janitors.....	76 66
For Rent of Room for Menominee Street School..	102 00
For Fuel for Menominee Street School.....	11 50
For Books for Indigent Pupils.....	18 18
For Wall Maps.....	11 25
For set Burbank's Visible Speech Charts.....	4 50
For Baade's Reading Case.....	7 50

Total Expenditures for the Year..... 4,051 09

Cash on hand July 31, 1882..... \$3,612 26

The following statement shows the expenditures on account of the Deaf Mute Schools paid out of the appropriation of \$15,000.00 made by the Thirty-first General Assembly of the State:

FOR SCHOOL YEAR.	For Salaries of Teachers.	For Salaries of Janitors.	For Rent.	For Fuel.	For Apparatus.	For Books for Pupils.	For Printing.	Total Expenditures.
1879-80.....	\$3,080 75	\$47 50	\$361 00	\$14 50	\$40 50	\$0 00	\$0 00	\$3,544 80
1880-81.....	3,801 00	50 00	104 00	14 72	13 00	0 00	9 63	3,792 35
1881-82.....	3,819 50	76 66	102 00	11 50	23 25	18 18	0 00	4,051 09
Total Expenditures	\$10,501 25	\$174 16	\$567 00	\$40 72	\$76 75	\$18 18	\$9 63	\$11,387 74

Total amount of Appropriation made by 31st General Assembly, \$15,000.00
Amount expended at close School Year, 1881-82..... 11,387.74

Balance of Appropriation on hand July 31, 1882 \$3,612.26

The Thirty-second General Assembly made an additional appropriation of \$5,000.00, which has not yet

been drawn. This amount, together with the balance on hand July 31, 1882, will make a total amount of \$8,612.26 for the further support of these schools, an amount, provided the expenditures in the future are about the same as during the year just closed, sufficient to carry on the schools till July, 1884. Inasmuch as the State Legislature meets biennially, it will be necessary that an appropriation be made by the Thirty-third General Assembly for sufficient, at least, for one years support of the schools, to enable them to continue till another session, as the appropriations hitherto made have taken effect in July succeeding the passage of the Act making the appropriation.

The question has arisen during the year, if any portion of the appropriation made for the support of these schools could be used for the payment of the board of pupils residing outside the city limits, who desired to avail themselves of the privileges afforded by them, and also, when necessary, of pupils residing in the city whose parents are too poor to provide suitably for them; and also for the payment of car fare of pupils residing in the city who are obliged to travel long distances in order to reach the schools; but it has been decided by the Attorney of the Board that, inasmuch as the Acts making the appropriations stated definitely that the money was to be used "for the expenses incurred in the *education* of deaf and dumb children in said school," no such use could be made of any part of the money appropriated, without further legislation on the subject.

The Acts both of 1879 and 1881 making the appropriations "for the support of the School for Deaf and Dumb Children in Chicago" contain the provision that "said school shall, so far as its accommodations will permit, receive deaf and dumb children of school age from any portion of the State." Nine of the pupils in attendance during the past year came from outside the city—three of them from the adjoining Town of Lake View on the north; two from the Town of Lake, on the south; one from Winnetka, Cook Co.; one from Barrington, Cook Co.; one from Grand Crossing, Cook Co.; and one from Belvidere, Boone Co. Two of these were boarded by Mr. Emery, from one of whom he received no pay for board, as the parents were too poor to pay board. It seems very desirable that the State Legislature, at its coming session, make some provision for boarding such pupils as desire to attend these schools, whose parents are unable to pay for their board, for the parents of by far the greater number of children thus afflicted are poor and have hard struggling to eke out for themselves sufficient for the actual necessities of life. If such provision were made, there is no doubt but that the number attending these schools would be largely increased another year. And even for those residing in the city who attend these schools, many are obliged to come long distances, as it is impossible to locate them to accommodate each individual pupil, and it would be well if further provision could

be made for the payment of the car fare of certain pupils from and to their homes.

One other necessity also exists to a certain extent—that is the matter of clothing—cases are constantly occurring in which pupils either do not attend at all or are obliged to leave school after once entering because their parents cannot provide them with suitable clothing.

We would commend all these needs to the careful consideration of the State Legislature, and ask that in making their appropriation for the continuance of these schools, they provide for these several requirements beyond the mere matter of educating the intellect.

The School Census of the City, taken during the month of June, 1882, shows that there were 211 deaf and dumb persons of all ages in the city at that time, distributed as to age and sex, as follows:

	Males.	Females.	Total.
Under 6 years of age.....	7	11	18
Between 6 and 16 years.....	44	33	77
Between 16 and 21 years.....	23	21	44
Over 21 years of age.....	35	37	72
Total.....	109	102	211

This probably does not, in most cases, include the pupils who were in attendance at the Jacksonville Institution, for the names of 89 pupils from the City of Chicago are found in the catalogue of this Institution for the two years ending September, 1880.

The question of the establishment of a Northern Illinois Institution for the Education of the Deaf and Dumb, somewhat similar in character to the Institution at Jacksonville, has been before the State Legislature

for the last three sessions; the bill at the last session was introduced March 16, 1881, and referred to the Committee on State Institutions, was reported on favorably by the Committee with various amendments and ordered to a first reading April 29, 1881, first reading took place May 2, 1882, and it was ordered to a second reading. It provided for an appropriation of \$100,000.00 for the purchase of a site not to exceed ten acres, to be located either in the City of Chicago or within five miles of the city, and for the erection of buildings and furnishing the same, and a further appropriation of \$25,000.00 for defraying the ordinary expenses of the Institution after it shall be ready for occupancy. It does seem that the time has arrived when an Institution of this kind should be established for the accommodation of pupils of this class residing in the Northern Counties of the State, and no point is more accessible than the City of Chicago, therefore its location should be not far from the city. If an appropriation could be secured at the coming session of the Legislature for the purchase of ground for the site, which should be from 15 to 25 acres, the location could be decided upon before the next succeeding session, and plans for buildings and other improvements could be determined upon so as to be ready for further action at the session of 1885.

Committee on Deaf Mute Schools.

REPORT OF COMMITTEE ON SANITARY AFFAIRS.

To the Board of Education of the City of Chicago.

GENTLEMEN: Your Committee on Sanitary Affairs, in accordance with the rules requiring an annual report, would respectfully state that the sanitary condition of the schools of Chicago has been, during the past year, very satisfactory. No school has been interfered with in its work by any epidemic of sickness. We have no means of knowing exactly the number of absences of pupils from illness or on account of sickness in their homes, or the number of such absences from contagious diseases, but there is reason to think they have not been larger than in previous years. The Schools co-operate with the Health Department in preventing the spread of contagious diseases. Pupils afflicted with such diseases are promptly dismissed, and those coming from houses where such cases exist are, as soon as the fact is known, required to cease their attendance till the danger of infection is over. It happens, occasionally, that pupils coming from infected houses wrongfully conceal that fact from their teachers

and continue their attendance. Principals and teachers have exercised a watchful care to prevent such occurrences and they have not been numerous during the year.

The State Board of Health passed an Order about the beginning of the year 1882, requiring that all pupils in the Public Schools of the State be vaccinated by the end of January, and that reports of the same be forwarded to their office. This Board voted January 26, to co-operate with the State Board in this matter. An Order was passed requiring Principals to preserve all vaccination certificates—a thing not previously done; a new form of vaccination certificate was devised, and a re-examination of all pupils was ordered to take place at once. This examination was made during the month of February. All who required it were vaccinated, and every pupil was provided with a new physician's certificate of vaccination, in accordance with the rule of the State Board. Your Committee believe this re-examination was made with as little annoyance and expense to the public as was possible under the circumstances, and its benefits to the public were incalculable.

The sanitary condition of our school buildings is, in the main, good. The ventilation in a few of them, however, has not been satisfactory. These are mostly such as are heated by steam coils in the school-rooms only, i. e., by direct radiation. In them, the means for properly changing the atmosphere in the rooms are entirely inadequate. It is the judgment of all sanitary

engineers and hygienists that a school room should receive every hour at least 400 to 1,000 cubic feet of fresh air per pupil; this would make for each room of 60 pupils 24,000 to 60,000 cubic feet. By no demonstration could it be established that in the school houses referred to a quarter of this required amount of fresh air has been supplied. That an increased amount of sickness occurs in such schools we cannot show by statistics, but there is little doubt of the fact. There is even less doubt that in these buildings pupils do mental work under greater difficulties and with poorer results than in those well ventilated.

The buildings thus defective have been the Skinner, Wells, Newberry, Haven, and the old buildings of the Brown and Moseley Schools. Fortunately, the steam heating apparatus and the ventilation devices of two of these, the Skinner and Wells, are being overhauled and greatly improved during the present vacation—to be ready for use at the opening of the schools in September. Each room is to be provided with an opening admitting an abundance of fresh air from without, to be warmed by passing over a steam coil specially arranged for the purpose. The foul air shafts are being improved and are to be supplied with steam coils to establish a more rapid upward current. It is hoped that these improvements will cause a sufficiently rapid change of air in the school rooms to make the ventilation, while not perfect, yet satisfactory.

It is unfortunate that the remaining buildings enumerated above must be left for another year in their present condition, and it is earnestly recommended that at as early a day as possible they receive careful attention toward improving their ventilation.

Early in the year the ventilation of the Hayes School building was materially improved in character, by the introduction into the basement of vitrified earthen ducts for conveying the fresh air to the steam coils for indirect radiation, instead of allowing it to pass first into the open space of the basement to be contaminated by bad odors and unsavory emanations. Your Committee believe that in all cases where this part of the building is not in a perfect condition of purity and cleanliness, it is undesirable if not positively harmful to take the air for indirect radiation—and consequently ventilation—from the general space of the basement, even though it be rapidly changed by a fan.

The lighting of all our school buildings is more or less faulty. In nearly every public school room in the city the light is admitted so as to fall upon both the back and left side of the pupil. The light that is directed against his back is full in the face of the teacher, to her great annoyance, discomfort and sometimes positive injury.

For the pupil, the only proper lighting is from the sides; mainly from the left side if possible. The light should never strike his back unless otherwise he would

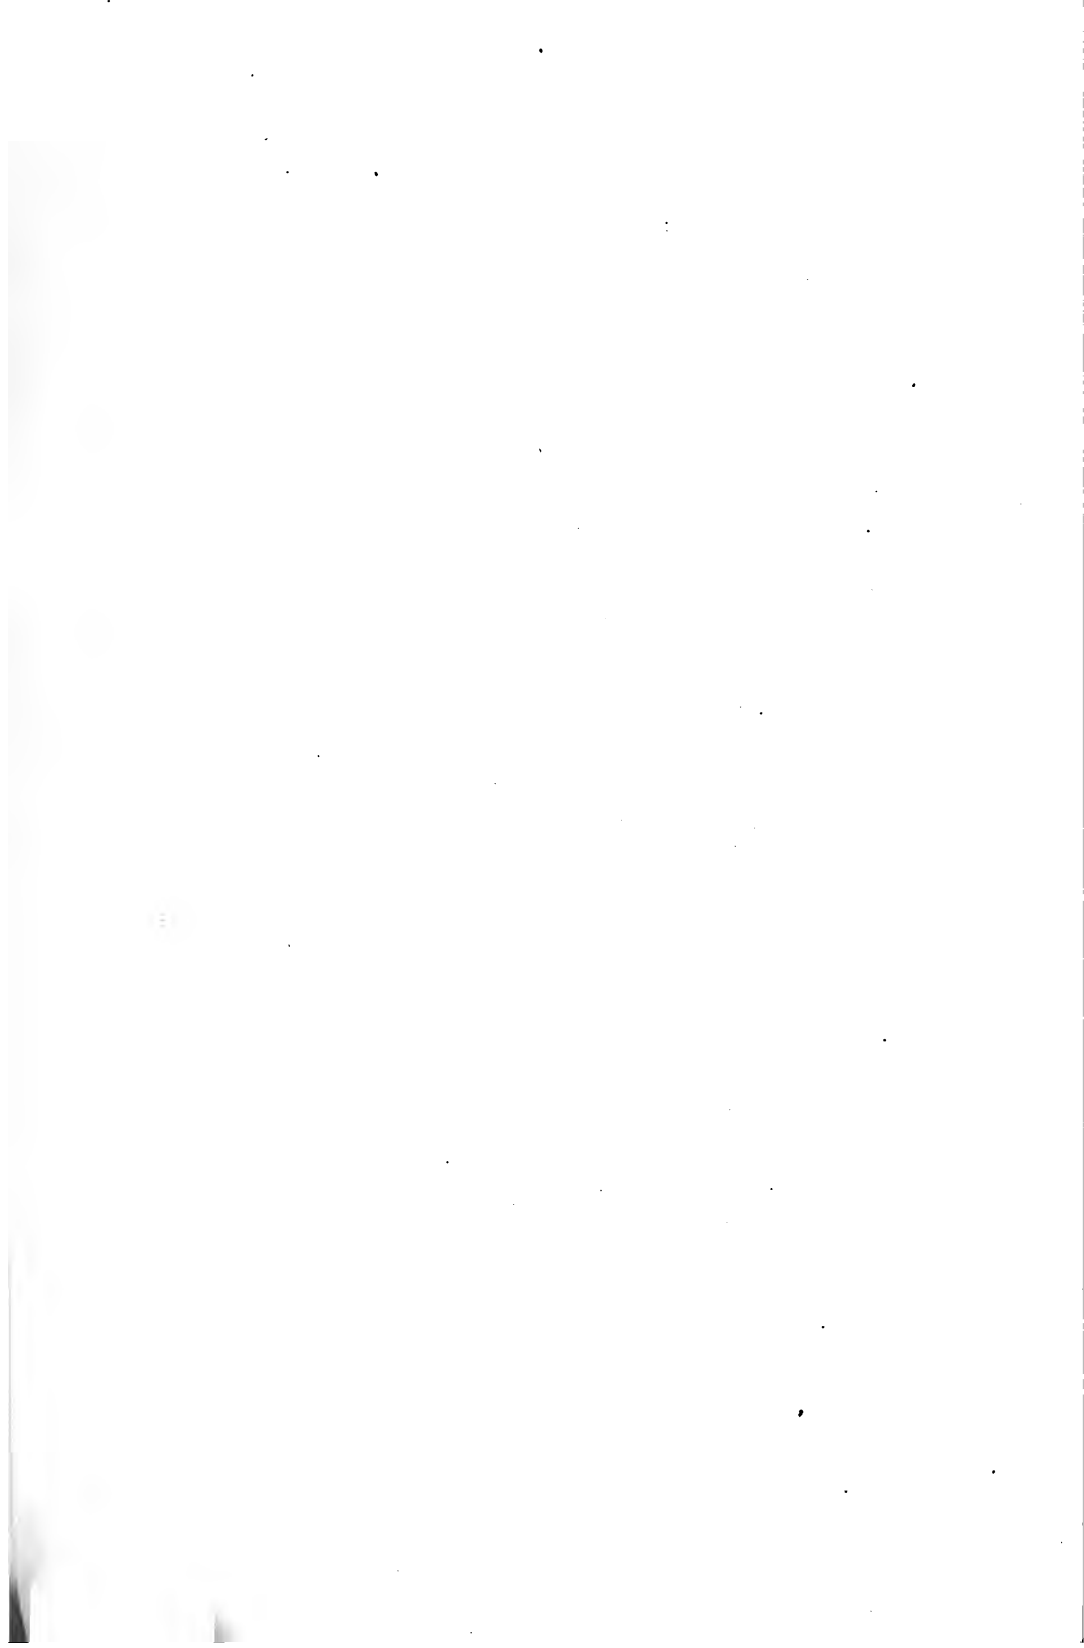

be in darkness. On this point we believe all observers and students of hygiene agree.

The baneful results of faulty lighting of school rooms are: hindrance to study and progress, greater labor on the part of the pupil, and worst of all, a straining tension of the eyes in his work which leads in many cases to a progressive near-sightedness and weakness of the eyes. Not only should the windows be placed on the left of the pupils, but they should be high in the room—reaching nearly to the ceiling and not extending down to the level of the tops of the desks. And the light should be abundant; the window space ought not to be less than one-sixth of the floor space of the room, it ought to be more. In the City of Chicago there is not to-day a public school building with these cardinal requisites for the safety of the eyes of the children—it is quite time there was. Your Committee therefore earnestly recommend that all buildings hereafter constructed be made to conform to the conditions here described.

NORMAN BRIDGE,
JAMES T. HEALY,
WILLIAM CURRAN,

Committee on Sanitary Affairs.

GRADUATES.

The following are the names of those who completed the full Four Year Course, and to whom Diplomas were awarded at the close of the School Year :

NORTH DIVISION HIGH SCHOOL.

Emma A. Brady,	Louise Jackson,	Lizzie A. McGillen,
Catharine L. Buckley,	Ida Jaeger,	Maggie R. Mahoney,
Maggie A. Cashin,	Libbie Joyce,	Julia T. Murphy,
Mary Lois Gage,	Annie D. Kenny,	Esther A. Renshaw,
Julia A. Garrity,	Cecelia E. Kilroy,	Kate L. Riordon,
Elizabeth Geohegan,	Ida L. Lamb,	Hattie C. Roland,
Hattie M. Horner,	Lizzie M. McCarthy,	Nellie E. Scanlan,
Ella C. Simpson,	Eva Belle Waite.	

SOUTH DIVISION HIGH SCHOOL.

Julia Baker,	Eugenia Hegan,	George E. Marshall,
Mary L. Cahill,	Annie L. Hickman,	May Merrifield,
Flora Spencer Colby,	Wilma M. Jacobs,	Nellie Patterson,
Mary T. Coleman,	Mary E. Kelly,	Sadie H. Reynolds,
Mary A. De Luce,	Annie J. Kerrigan,	Ella F. Simonds,
Bertha Feinberg,	Annie E. King,	Joseph G. Snyder,
Flora Felsenthal,	Isabella King,	Cassie Solon,
Minnie Goodman,	Henry A. Kohn,	Lucy S. Silke,
Florence Hayward,	Josephine McConville,	Kate R. Slocum,
Annie M. Wiltshire,	Esther Witkowsky.	

WEST DIVISION HIGH SCHOOL.

Louis Reno Cobb,	Nettie M. Dreier,	Nellie Maloney,
Frederick G. Novie,	Maggie R. Duffy,	Emma D. Mann,
Maggie C. Adams,	Therese W. Dunlap,	Anna C. Marchant,
Kate M. Alling,	Mary M. Dunton,	Fannie S. Miller,
Grace Ayers,	Emily E. Elliott,	Wilhelmina E. Miller,
Mary M. Bartelme,	Sarah A. Fleming,	Belle M. Murray,
Lillie M. Blackall,	Allie H. Foster,	Jane Howard O'Brien,
Mary B. Boynton,	Evelyn H. Frisbie,	Kitty L. O'Byrne,
Jane D. Brown,	Celia M. Gavin,	Jenny B. Okeson,
Grace Bryant,	Rosalie C. Giffney,	Henrietta E. Olson,
Elizabeth D. Campbell,	Valborg A. Gunderson,	Alice Ottaway,
Effie A. M. Christenson,	Mary A. Hartigan,	Mary A. Prosser,
Jennie M. Clancey,	Carrie L. Hartwell,	Agnes Redfield,
Sarah Colby,	Margaret C. Hitt,	Anna M. Robinson,
Rhoda J. Cowan,	Belle T. Jennings,	Ada Sanderson,
Sarah H. Crosby,	Della L. Jones,	Estha Schottenfels,
Frances L. Crumb,	Miriam Knight,	Agnes L. Scully,
Margaret Dooley,	Kittie E. Maloney,	Elsie J. Sweet,
	Mary L. Todd,	Lizzie Warhurst,
	Martha T. Welch,	Mary Weldon.

The following are the names of those who completed the Three Year Classical Course, and to whom Diplomas were issued at the close of the School Year:

SOUTH DIVISION HIGH SCHOOL.

Herbert L. Draper,	Lester E. Frankenthal,	Harris H. Gregg,
Edwin Leight Porch,	Herman W. Stillman.	

WEST DIVISION HIGH SCHOOL.

Ernest A. Blackmer,	George M. Hyde,	Warren C. Noyes,
Percy W. Blackmer,	Charles G. Lewis,	Albert J. Pickett,
John B. Carse,	George Mayer,	Fred. W. Porter,
Edward H. Fallows,	George A. Mulfinger,	Isaac F. Rubel,
Edwin R. Rundell,		James G. Wakefield,
Fred. Sprague,		Ira C. Wood.

CERTIFICATES OF COMPLETION OF TWO YEAR COURSE.

Certificates of Completion of the Two Year Partial Course were issued to the following named pupils:

NORTH DIVISION HIGH SCHOOL.

Max N. Epstein,

Andrew Sullivan.

SOUTH DIVISION HIGH SCHOOL.

Edward G. Alexander,	Julia Cudney,	Edith E. Kerr,
Edward C. Calkins,	Horatio H. Hayden,	Henrietta Long,
Sherman G. Miller,	William Oswald.	

WEST DIVISION HIGH SCHOOL.**CLASS OF DECEMBER, 1881.**

Frank E. Hayner,	Cath'ne A. Cunningham,	Bertha E. Jones,
Annie May Andrus,	Helen Greenebaum,	Harriett B. Lutz,
Emma C. Browne,	Julia F. Groves,	Maggie L. Lynch,
Frances C. Carter,	Ida C. Guilbert,	Bessie McKay,
Sarah Chambers,	Grace Hubbell,	Mary J. Monroe,
Antonia A. Crisen,	Amelia W. Jauncey,	Flora C. Thompson,
Lydia R. Timmons,	Christina B. Williamson.	

CLASS OF JUNE, 1882.

Sarah Carrie Bond,	Anna M. Krause,	Ethel C. Price,
Margaret E. Brown,	Louise Lovi,	Charles A. Roberts,
Henry Wallace Carter,	Henry Mohr,	Maude M. Rowland,
Samuel Carter,	Sara E. Patchel,	Sadie F. Ryan,
Amanda Adele Diehl,	John Ritchie Patterson,	Bertha S. Strauss,
Tillie M. Hershman,	John Henry Pettibone,	John Frederick Temple,
Julia D. Ingalls,	Cora Porter,	Lizzie F. Tobias,
Willet G. Wanzer,	Minnie C. Wilson.	

A Certificate of Completion of two years of the full Four Year Course was awarded at the close of the year to Mary B. Preble, of the South Division High School.

BOUNDARIES
OF
SCHOOL DISTRICTS.

JANUARY 1, 1883.

GRAMMAR SCHOOL DISTRICTS.

ARMOUR STREET SCHOOL.

Southeast corner of Armour and Ohio Streets.

Beginning at corner of Noble and Superior Streets, thence following Superior Street to Wood Street; Wood Street to Kinzie Street; Kinzie Street to Elizabeth Street; Elizabeth Street to Indiana Street; Indiana Street to Noble Street; and Noble Street to place of beginning.

Primary Pupils in this District residing West of Paulina Street attend the *Lincoln Street School*.

BROWN SCHOOL.

Warren Avenue, between Page and Wood Streets.

Beginning at corner of Kinzie and Elizabeth Street, thence following Kinzie Street to Robey Street; Robey Street to Lake Street; Lake Street to Hoyne Avenue; Hoyne Avenue to Monroe Street; both sides of Monroe Street to Loomis Street; Loomis and Sheldon Streets to Washington Boulevard; Washington Boulevard to Elizabeth Street; and Elizabeth Street to the place of beginning.

Primary Pupils in this District residing East of Ashland Avenue and North of Madison Street, attend the *Elizabeth Street School*.

BURR SCHOOL.

Southwest corner of Ashland and Waubansia Avenues.

Beginning at the North Branch of the Chicago River at Robey Street, thence following Robey Street to Milwaukee Avenue; Milwaukee Avenue to Ridgeville Road; Ridgeville Road to Black Hawk Street; Black Hawk Street to the North Branch of the River; and the North Branch to the place of beginning.

CARPENTER SCHOOL.

Southwest corner of Rucker and Huron Streets.

Beginning at the corner of May and Augusta Streets, thence following Augusta Street to Currier Street; on line of Currier Street extended to Cornell Street; Cornell Street to Noble Street; Noble Street to Indiana Street; Indiana Street to May Street; and May Street to the place of beginning.

CENTRAL PARK SCHOOL.

Southeast corner of Walnut Street and Kedzie Avenue.

Beginning at the corner of Rockwell and Kinzie Streets, thence following Kinzie Street to California Avenue; California Avenue to Chicago Avenue; Chicago Avenue to the Western City Limits; the City Limits to Barry Point Road; Barry Point Road to Sacramento Street; Sacramento Street to Washington Boulevard; Washington Boulevard to Francisco Street; Francisco Street to Lake Street; Lake Street to Rockwell Street; and Rockwell Street to the place of beginning.

CLARKE SCHOOL.

Ashland Avenue, between Thirteenth Street and Thirteenth Place.

Beginning at the corner of Center Avenue and Taylor Street, thence following Taylor Street to Loomis Street; Loomis Street to Polk Street; Polk Street to Hoyne Avenue; Hoyne Avenue to Twelfth Street; Twelfth Street to Oakley Avenue; Oakley Avenue to C., B. & Q. R. R.; C., B. & Q. R. R. to Center Avenue; and Center Avenue to place of beginning.

Primary Pupils residing East of Loomis Street within the above described limits attend the *West Thirteenth Street School*.

COTTAGE GROVE SCHOOL.

Thirty-fifth Street, between Cottage Grove and Stanton Avenues.

Beginning on Thirty-first Street at Lake Michigan, thence following Thirty-first Street to Rhodes Avenue; Rhodes Avenue to Thirty-third Street; Thirty-third Street to South Park Avenue; South Park Avenue to Thirty-fourth Street; Thirty-fourth Street to Indiana Avenue; Indiana Avenue to the Southern City Limits; the City Limits to Lake Michigan; and the Lake to the place of beginning.

DORE SCHOOL.

Harrison Street, between Halsted and DesPlaines Streets.

Beginning on the South Branch of the Chicago River at Jackson Street, thence following Jackson Street to Sangamon Street; Sangamon Street to Congress Street; Congress Street to Morgan Street; Morgan Street to Harrison Street; Harrison Street to Aberdeen Street; Aberdeen Street to Taylor Street; Taylor Street to the South Branch of the Chicago River, and the River to the place of beginning.

Primary Pupils residing within the following described limits in the Dore School District attend the *Polk Street School*, to-wit:—Beginning on Mather

Street at the South Branch of Chicago River, thence following Mather Street to Halsted Street; Halsted Street to Polk Street; Polk Street to Aberdeen Street; Aberdeen Street to Taylor Street; Taylor Street to the South Branch of Chicago River, and the River to the place of beginning.

DOUGLAS SCHOOL.

Southeast corner of Thirty-second Street and Forest Avenue.

Beginning on Twenty-ninth at Lake Michigan, thence following Twenty-ninth Street to Clark Street; Clark Street to Thirty-third Street; Thirty-third Street to Wabash Avenue; Wabash Avenue to Thirty-fifth Street; Thirty-fifth Street to Indiana Avenue; Indiana Avenue to Thirty-fourth Street; Thirty-fourth Street to South Park Avenue; South Park Avenue to Thirty-third Street; Thirty-third Street to Rhodes Avenue; Rhodes Avenue to Thirty-first Street; Thirty-first Street to Lake Michigan; and the Lake to the place of beginning.

Branch of Douglas School.—Primary Pupils residing between Twenty-ninth and Thirty-third Streets, and between State and Clark Streets attend the Branch on Dearborn Street, near Twenty-ninth Street.

Primary Pupils residing East of Prairie Avenue and North of Thirtieth Street within the limits of the Douglas School District attend the *Calumet Avenue School*.

FOSTER SCHOOL.

Union Street, between O'Brien and Dussold Streets.

Beginning on Taylor Street at the South Branch of the Chicago River, thence following Taylor Street to Center Avenue; Center Avenue to C., B. & Q. R. R.; C., B. & Q. R. R. to Morgan Street; Morgan Street to the South Branch of the Chicago River; and the River to the place of beginning.

Primary Pupils residing North of DeKoven Street, taking both sides of DeKoven Street, and East of Halsted Street within the above described limits attend the *Polk Street School*.

Primary Pupils within the above described limits of the Foster School District residing between Maxwell Street (taking both sides of Maxwell Street) and the C., B. & Q. R. R., and east of Halsted Street, attend the *West Fourteenth Street School*.

Primary Pupils residing South of the C., B. & Q. R. R. within the above described limits attend the *Walsh School*.

Primary Pupils residing within the following described limits, of the Foster School District attend the *West Thirteenth Street School*, to-wit: Beginning at the corner of Morgan and Taylor Streets, thence following Taylor Street to Center Avenue; Center Avenue to Fifteenth Street; Fifteenth Street to Margaret Street; Margaret Street to West Fourteenth Street; West Fourteenth Street to Waller Street; Waller Street to Maxwell Street; Maxwell Street to Morgan Street; and Morgan Street to the place of beginning.

Primary Pupils residing within the following described limits of the Foster School District attend the *Garfield School*, to-wit: Beginning at the

corner of Halsted and Taylor Streets, thence following Taylor Street to Morgan Street; Morgan Street to Maxwell Street; Maxwell Street to Waller Street; Waller Street to Fourteenth Street; Fourteenth Street to Margaret Street; Margaret Street to Fifteenth Street; Fifteenth Street to Center Avenue; Center Avenue to C., B. & Q. R. R.; C., B. & Q. R. R. to Halsted Street; and Halsted Street to the place of beginning.

FRANKLIN SCHOOL.

Northeast corner of Division and Sedgwick Streets.

Beginning at the corner of Schiller and Wells Streets, thence following Schiller Street to Sedgwick Street; Sedgwick Street to Black Hawk Street; Black Hawk Street to the North Branch of the Chicago River; the River to Chicago Avenue; Chicago Avenue to Wells Street; and Wells Street to the place of beginning.

Primary Pupils residing within the following described limits in the Franklin School District attend the *Vedder Street School*, to-wit: Beginning at the corner of Black Hawk and Larrabee Streets, thence following Black Hawk Street to the North Branch of the Chicago River; the River to Haines Street; Haines Street to Elm Street; Elm Street to Larrabee Street; and Larrabee Street to the place of beginning.

Primary Pupils residing within the following described limits in the Franklin School District attend the *Oak Street School*, to-wit: Beginning at the corner of Wendell and Wells Streets, thence following Wendell Street to Sedgwick Street; Sedgwick Street to Elm Street; Elm Street to Haines Street; Haines Street to the North Branch of the Chicago River; the River to White Street; White Street to Market Street; Market Street to Whiting Street; Whiting Street to Wells Street; and Wells Street to the place of beginning.

Primary Pupils residing within the following described limits in the Franklin School District attend the *Pearson Street School*, to-wit: Beginning at the corner of Wells and Whiting Streets, thence following Whiting Street to Market Street; Market Street to White Street; White Street to the North Branch of the Chicago River; the River to Chicago Avenue; Chicago Avenue to Wells Street; and Wells Street to the place of beginning.

HAVEN SCHOOL.

Wabash Avenue, between Fourteenth and Sixteenth Streets.

Beginning on Harmon Court at Lake Michigan, thence following Harmon Court to State Street; State Street to Twelfth Street; Twelfth Street to the South Branch of the Chicago River; the River to Twenty-first Street; Twenty-first Street to Lake Michigan; and the Lake to the place of beginning.

Primary Pupils within the above described limits residing West of State Street, taking in both sides of State Street, and North of the C., B. & Q. R. R. Tracks, attend the *Third Avenue School*.

Primary Pupils within the above described limits residing East of Dearborn Street and South of Sixteenth Street, attend the *Wentworth Avenue School*.

HAYES SCHOOL.

Leavitt Street, between Walnut and Fulton Streets.

Beginning at the corner of Robey and Kinzie Streets, thence following Kinzie Street to Rockwell Street; Rockwell Street to Madison Street; Madison Street to Western Avenue; Western Avenue to Adams Street; Adams Street to Hoyne Avenue; Hoyne Avenue to Lake Street; Lake Street to Robey Street; and Robey Street to the place of beginning.

HOLDEN SCHOOL.

Northeast corner of Deering and Thirty-First Streets.

Beginning on Quarry Street at the South Branch of the Chicago River; thence following the River to the Illinois and Michigan Canal; the Illinois and Michigan Canal to the Western City Limits; the Western City Limits to the Southern City Limits; the Southern City Limits to the South Branch of the Chicago River; the South Branch to Thirty-fifth Street; Thirty-fifth Street to Laurel Street; Laurel Street to Thirty-fourth Street; Thirty-fourth Street to Halsted Street; Halsted Street to Twenty-ninth Street; Twenty-ninth Street to Stearns Street; Stearns Street to Quarry Street; and Quarry Street to the place of beginning.

Primary Pupils within the above described limits residing west of the South Branch of the Chicago River, and south of the Illinois and Michigan Canal, attend the *Brighton School*. Fifth Grade pupils residing within these limits are permitted to remain at the Brighton School.

JONES SCHOOL.

Southeast corner of Third Avenue and Harrison Street.

Beginning at the mouth of the Chicago River, thence following the Main River to the South Branch of the River; the South Branch to Twelfth Street; Twelfth Street to State Street; State Street to Harmon Court; Harmon Court to Lake Michigan; and the Lake to the place of beginning.

Primary Pupils within the above described limits residing South of Polk Street and West of State Street, including both sides of State Street, attend the *Third Avenue School*.

KING SCHOOL.

Harrison Street, between Western and Campbell Avenues.

Beginning at the corner of Hoyne Avenue and Adams Street, thence following Adams Street to Western Avenue; Western Avenue to Madison Street; Madison Street to Rockwell Street; Rockwell Street to Twelfth Street; Twelfth Street to California Avenue; California Avenue to the C., B. & Q. R. R.; C., B. & Q. R. R. to Oakley Avenue; Oakley Avenue to Twelfth Street; Twelfth Street to Hoyne Avenue; Hoyne Avenue to Polk Street; Polk Street to Leavitt Street; and Leavitt Street, taking in both sides of the street, to the place of beginning.

Public Schools.

KINZIE SCHOOL.

Northwest corner of Ohio and LaSalle Streets.

Beginning at the corner of Clark and Huron Streets; thence following Huron Street to Wells Street; Wells Street to Chicago Avenue; Chicago Avenue to the North Branch of the Chicago River; the North Branch to the Main River; the Main River to Lake Michigan; the Lake to Indiana Street; Indiana Street to Dearborn Avenue; Dearborn Avenue to Ohio Street; Ohio Street to Clark Street; and Clark Street to the place of beginning.

Primary Pupils within the above described limits residing North of Superior Street attend the *Pearson Street School*.

Primary Pupils residing within the following described limits in the Kinzie School District attend the *Huron Street School*, to-wit:—Beginning at the corner of Clark and Superior Streets, thence following Superior Street to the North Branch of the Chicago River; the North Branch to the Main River; the Main River to Wells Street; Wells Street to Ontario Street; Ontario to Clark Street; and Clark Street to the place of beginning.

LA SALLE SCHOOL.

Northwest corner of Hammond and Eugenie Streets.

Beginning on Center Street at Lake Michigan, thence following Center Street to Church Street; Church Street to Black Hawk Street; Black Hawk Street to Sedgwick Street; Sedgwick Street to Schiller Street; Schiller Street to Lake Michigan; and the Lake to the place of beginning.

LAWNDALE SCHOOL.

Southwest corner of Central Park Avenue and Twenty-fifth Street.

All that portion of the City lying West of California Avenue, and South of Twelfth Street.

LINCOLN SCHOOL.

Larrabee Street, between Fullerton and Belden Avenues.

Beginning on Fullerton Avenue (Northern City Limits) at Lake Michigan, thence following Fullerton Avenue to Halsted Street; Halsted Street to Center Street; Center Street to Lake Michigan; and the Lake to the place of beginning.

MARQUETTE SCHOOL.

Southwest corner of Wood and Congress Streets.

Beginning at the corner of Adams and Loomis Streets, thence following Adams Street, including both sides of the street, to Hoyne Avenue; Hoyne Avenue to Polk Street, taking in both sides of Hoyne Avenue; Polk Street to Loomis Street; and Loomis Street to the place of beginning.

MOSELEY SCHOOL.

Northwest corner of Michigan Avenue and Twenty-fourth Street.

Beginning on Twenty-first Street at Lake Michigan, thence following Twenty-first Street to Stewart Avenue; Stewart Avenue to Twenty-second

Street; Twenty-Second Street to Wentworth Avenue; Wentworth Avenue to Twenty-fifth Street; Twenty-fifth Street to Clark Street; Clark Street to Twenty-ninth Street; Twenty-ninth Street to Lake Michigan; and the Lake to the place of beginning.

Primary Pupils residing within the following described limits in the Moseley School District attend the *Calumet Avenue School*, to-wit:—Beginning on Twenty-first Street at Lake Michigan, thence following Twenty-first Street to Indiana Avenue; Indiana Avenue to Twenty-sixth Street; Twenty-sixth to Clark Street; Clark Street to Twenty-ninth Street; Twenty-ninth Street to Lake Michigan, and the Lake to the place of beginning.

Primary Pupils residing within the following described limits in the Moseley School District attend the *Wentworth Avenue School*, to-wit:—Beginning at the corner of Dearborn and Twenty-first Streets, thence following Twenty-first Street to Stewart Avenue; Stewart Avenue to Twenty-second Street; Twenty-second Street to Wentworth Avenue; Wentworth Avenue to Twenty-fourth Street; Twenty-fourth Street to Dearborn Street; and Dearborn Street to the place of beginning.

Primary Pupils residing between Twenty-fourth and Twenty-fifth Streets, and between Wentworth Avenue and Dearborn Street attend the *Ward School*.

NEWBERRY SCHOOL.

Northwest corner of Orchard and Willow Streets.

Beginning at the corner of Wisconsin and Church Streets, thence following Wisconsin Street to Larrabee Street; Larrabee Street to Center Street; Center Street to Fremont Street; Fremont Street and Fremont Street extended to North Avenue; North Avenue to the North Branch of the Chicago River; the North Branch to Black Hawk Street; Black Hawk Street to Church Street; and Church Street to the place of beginning.

NICKERSONVILLE SCHOOL.

Northeast corner of Lewis Street and Garfield Avenue.

Beginning at the corner of Fullerton Avenue and Halsted Street, thence following Fullerton Avenue to the North Branch of the Chicago River; the North Branch to North Avenue; North Avenue to point of Fremont Street extended; line of extension of Fremont Street, and Fremont Street to Center Street; Center Street to Halsted Street; and Halsted Street to the place of beginning.
